

```
using System;
class CharSet {    // display ASCII Code of characters

    public static void    Main( string[] arg ) {
        int i, cpl;

        cpl = 5;
        i = 32;
        while ( i <= 127 ) {
            Console.Write(i + "\t"+ (char) i + "\t");
            i = i + 1;
            if ( (i % cpl) == 0 )
                Console.WriteLine(" ");
        }
    }
}
```
