

```
using System;

class CharSetAr { // write codes of string's characters

    public static void Main( string[] arg ) {
        string S;
        int i;
        char c;

        // Read S
        S= Console.ReadLine();
        // Display Code of characters of ( S )
        i = 0;
        while ( i < S.Length ) {
            c = S[i];
            Console.WriteLine(" Unicode in S["+i+"]= "+ (int) c);
            i = i + 1;
        }
    }
}
```
