

All Windows 8 Related Topics - Tools, Apps, Hardware, and Platform

Type Session

Tools [1. Tools for building Metro style apps](#)

//

[2. Improving software quality using Visual Studio 11 C++ Code Analysis](#)

//

[3. Developing and testing on Windows 8 with Hyper-V](#)

//

[4. A lap around Visual Studio 11 Express for Metro style apps using C++](#)

//

[5. A deep dive into Expression Blend for designing Metro style apps using HTML](#)

//

[6. Introducing the Windows libraries for JavaScript](#)

//

[7. A deep dive into Visual Studio 11 Express for designing Metro style apps using XAML](#)

//

[8. Debugging your Metro style apps using HTML](#)

//

[9. Tips and tricks for developing Metro style apps using XAML](#)

//

[10. Building Metro style apps using JavaScript](#)

//

[11. Unit testing your metro style apps built using XAML](#)

//

[12. Manual testing of Windows Metro style apps built using HTML](#)

//

[13. Using the Windows Runtime from C# and Visual Basic](#)

//

[14. Using the Windows Runtime from C++](#)

//

[15. Using the Windows Runtime from JavaScript](#)

//

[1. Debugging connected Windows 8 apps](#)

//

[2. Under the covers with C++ for Metro style apps](#)

//

[3. A lap around DirectX game development tools](#)

//

[4. Building a sample Metro style canvas paint app using HTML](#)

//

[5. Bringing existing C++ code into Metro style apps](#)

//

[6. Bringing existing managed code into Metro style apps](#)

//

[7. Advanced IntelliTrace in production with Visual Studio 11](#)

//

[8. Working on an agile team with Visual Studio 11 and Team Foundation Server 11](#)

//

[9. Architectural discovery with Visual Studio 11](#)

//

[10. ASP.NET 4.5 loves HTML5, CSS3 & JavaScript](#)

//

[11. It's not a great phone app without ASP.NET services and push notifications](#)

//

[12. Building data-driven HTML5 apps with WCF RIA Services](#)

//

[13. Building event-driven, long-running apps with Windows workflow](#)

//

[14. Taming GPU compute with C++ AMP](#)

//

[15. Progressively enable the mobile web with ASP.NET MVC 4, HTML5, and jQuery Mobile](#)

//

[1. Async made simple in Windows 8, with C# and Visual Basic](#)

//

[2. Developer collaboration with Team Foundation Server 11](#)

//

[3. Deep dive into the kernel of the .NET Framework](#)

//

[4. Future directions for C# and Visual Basic](#)

//

[5. Taking your Application Lifecycle Management to the cloud with the Team Foundation Service](#)

//

[6. What's new in Visual Studio 11](#)

//

[7. WebMatrix: uber geek in designer clothes](#)

//

[8. The zen of async: Best practices for best performance](#)

//

[9. Tips & tricks: how to use Visual Studio to the fullest](#)

//

[10. What's new in Visual Studio 11 for Application Lifecycle Management](#)

//

[11. What's new in .NET Framework 4.5](#)

//

[12. Writing modern C++ code: how C++ has evolved over the years](#)

//

[13. Tips and tricks for developing Metro style apps using C++](#)

//

[14. Create rich, data-driven Web apps with ASP.NET 4.5 Web Forms](#)

//

[15. A .NET developer's view of Windows 8 app development](#)

//

[1. Best practices for writing safe and secure Metro style apps using HTML5](#)

//

[2. Windows Phone: building apps that customers love, end to end](#)

//

[3. 8 traits of great Metro style apps](#)

//

[4. Keynote #1](#)

//

Apps

[1. Prepare your apps for Windows 8 and beyond](#)

//

[2. Introducing the Windows Store](#)

//

[3. Enabling trials and in-app offers in your Metro style app](#)

//

[4. Building high performance Metro style apps using HTML5](#)

//

[5. Make great Metro style apps that are touch-optimized using HTML5](#)

//

[6. Build advanced touch apps in Windows 8](#)

//

[7. Build assistive technologies for Windows 8](#)

//

[8. Bring apps to life with Metro style animations in HTML5](#)

//

[9. Reach your customers' devices with one beautiful HTML5 user interface](#)

//

[10. Build polished collection and list apps in HTML5](#)

//

[11. Build data-driven collection and list apps using ListView in HTML5](#)

//

[12. Create Metro style apps quickly with built-in controls](#)

//

[13. Stand out with styling in your HTML app](#)

//

[14. Designing Metro style apps that are touch-optimized](#)

//

[15. Designing Metro style: principles and personality](#)

//

[1. Using tiles and notifications](#)

//

[2. How to declare your app's capabilities](#)

//

[3. Share: your app powers the Windows 8 share experience](#)

//

[4. Search: integrating into the Windows 8 search experience](#)

//

[5. Integrating with the Windows device experience](#)

//

[6. Fundamentals of Metro style apps: how and when your app will run](#)

//

[7. Real time communication: keep your Metro style app connected whether it is running or suspended](#)

//

[8. Reach a worldwide audience by building a world-ready app](#)

//

[9. Code with confidence: dynamic web content in Metro style apps using HTML5](#)

//

[10. Stand out with styling and animation in your XAML app](#)

//

[11. Make great touch apps using XAML](#)

//

[12. The web-to-Windows journey: turning your web assets into a Windows app](#)

//

[13. Build polished collection and list apps using XAML](#)

//

[14. Build world-ready Metro style apps using XAML](#)

//

[15. Build accessible Metro style apps using XAML](#)

//

[1. Metro style apps using XAML: what you need to know](#)

//

[2. Metro style apps using HTML5 from start to finish](#)

//

[3. Metro style apps using XAML: Make your app shine](#)

//

[4. Power your app with Live services](#)

//

[5. Integrating stunning media experiences in XAML](#)

//

[6. Windows Phone: how to build a game](#)

//

[7. Windows Phone multitasking](#)

//

[8. Windows Phone app performance and optimization](#)

//

[9. Windows Phone XAML apps](#)

//

[10. Windows Phone user experience design](#)

//

[11. Reaching more customers with accessible Metro style apps in HTML5](#)

//

[12. Create reusable custom Metro style controls](#)

//

[13. Reach all your customer's devices with one beautiful XAML user interface](#)

//

[14. Build data-driven collection and list apps using XAML](#)

//

[15. The lifetime of XAML text: from input to display through printing](#)

//

hardware

[1. Advanced app and driver debugging](#)

//

[2. Reducing the memory footprint of drivers and apps](#)

//

[3. Building high quality Windows PCs using the assessment and deployment kit](#)

//

[4. Scaling And Extending Windows Assessments To Improve System Quality \(Part I & II\)](#)

//

[5. Improving battery life and energy efficiency](#)

//

[6. Building great networked media devices for Play To apps](#)

//

[7. Building great touch systems](#)

//

[8. Touch firmware development: Talking HID to Windows](#)

//

[9. Certifying graphics experiences on Windows 8](#)

//

[10. Understanding the Windows 8 graphics driver model](#)

//

[11. Chalk talk: transitioning from XDDM to WDDM](#)

//

[12. Developing drivers in Visual Studio](#)

//

[13. Connecting printing devices to Windows using v4 printer drivers](#)

//

[14. Moving driver quality upstream with WDK driver verification and test tools](#)

//

[15. Running Windows from an external USB drive with Windows To Go](#)

//

[1. Architecting and integrating sensor drivers](#)

//

[2. Introducing low-power buses for Windows 8](#)

//

[3. Connecting Bluetooth Low Energy devices to Windows](#)

//

[4. Integrating Bluetooth on low-power buses](#)

//

[5. Understanding USB 3.0 in Windows 8](#)

//

[6. USB Debugging Innovations in Windows 8 \(Part I, II, & III\)](#)

//

[7. Windows Certification: improvements to the logo program](#)

//

[8. Designing systems and developing drivers for NFC](#)

//

[9. Building and delivering a great Metro style app for your device](#)

//

[10. Introducing Metro style device apps](#)

//

[11. Simplifying wireless and network device discovery and pairing](#)

//

[12. Building great Metro style apps for mobile broadband devices](#)

//

[13. Designing great devices and drivers](#)

//

[14. Using the Windows Driver Framework to build better drivers](#)

//

[15. Understanding Wi-Fi Direct in Windows 8](#)

//

[1. Understanding mobile broadband and connection management in Windows 8](#)

//

[2. Understanding Wi-Fi networking in Windows 8](#)

//

[3. Understanding Connected Standby](#)

//

[4. Delivering a secure and fast boot experience with UEFI](#)

//

[5. Delivering great performance and battery life](#)

//

[6. Building hardware-based security with a Trusted Platform Module \(TPM\)](#)

//

[7. Networking for connected standby](#)

//

[8. Improving performance with the Windows Performance Toolkit](#)

//

[9. Improving code quality with Windows error reporting](#)

//

[10. Building a great Metro style device app for your printer](#)

//

[11. Certifying hardware with the Windows Hardware Certification Kit](#)

//

[12. Chalk talk for sensor and location support in Windows](#)

//

[13. Windows Certification Program, process and tools](#)

//

[14. NDIS Driver Testing and Certification \(Part I, II, & III\)](#)

//

[15. Building a great Metro style device app for your camera](#)

//

[1. Connecting Windows 8 to mobile broadband and Wi-Fi networks](#)

//

[2. Delivering great hardware solutions for Windows](#)

//

[3. Reimagining the experience for connecting with devices](#)

//

[4. Building Metro style apps that connect to specialized devices](#)

//

[5. Building great USB 3.0 devices](#)

//

[6. Building great Windows 8 systems](#)

//

[7. Understanding Push Button Reset](#)

//

[8. Delivering great device installation experiences](#)

//

[9. Advanced driver code analysis techniques](#)

//

[10. Best practices for packaging and distributing device drivers](#)

//

[11. Inside the Windows 8 driver developer workflow](#)

//

[12. Introduction to assessments](#)

//

[13. Introduction to the Boot Performance Assessment](#)

//

[14. Introduction to the Internet Explorer launch assessment](#)

//

[15. Introduction to the streaming assessment](#)

//

[1. Introduction to ADK custom jobs](#)

//

[2. Capturing and analyzing performance traces](#)

//

[3. Customizing WPA Trace Views](#)

//

[4. Introduction to the new WPA user interface](#)

//

[5. Understanding pool usage using Windows Performance Analyzer](#)

//

[6. Understanding heap data using Windows Performance Analyzer](#)

//

[7. Testing Wi-Fi networking devices](#)

//

[8. Testing mobile broadband devices](#)

//

[9. Customizing ADK assessment reports](#)

//

[10. Packaging assessments for use on a second computer](#)

//

[11. Understanding VirtualAlloc usage using Windows Performance Analyzer](#)

//

[12. How to retrieve configuration and status information from USB printers in Windows 8](#)

//

[13. Windows 8 kernel debugging: New protocols and certification requirements](#)
