

Editorial Board

Editor-in-Chief

S.P. Azen

Co-Editors

North, Central, South America, Australia and New Zealand

S.P. Azen

Department of Preventive Medicine, University of Southern California, 1540 Alcazar Street, CHP 222,
Los Angeles, CA 90033, USA, E-mail: sazen@usc.edu

Europe and Africa

E.J. Kontoghiorghes

School of Computer Science and Information Systems, Birkbeck College, University of London, Malet Street, London WC1E
7HX, UK and Department of Public and Business Administration, University of Cyprus, P.O. Box 20537, CY-1678 Nicosia,
Cyprus, E-mail: csda@dcs.bbk.ac.uk, erricos@dcs.bbk.ac.uk

Asia

J.C. Lee

Department of Statistics, Korea University, 1 Anam-dong, Sungbuk-ku, Seoul 136-701, South Korea,
E-mail: jaeclee@korea.ac.kr

Advisory Board

D.A. Belsley

Boston College, Chestnut Hill, MA, USA

P.M. Bentler

Econometrics, forecasting, data analysis, simultaneous systems estimation, computational research
University of California, Los Angeles, CA, USA

M.B. Brown

Psychometrics, factor analysis, latent variables

M.A. Cameron

University of Michigan, Ann Arbor, MI, USA

Multiway frequency tables, statistical computing, categorical data analysis

N.R. Draper

CSIRO, North Ryde, Australia

Time series analysis

L. Edler

University of Wisconsin, Madison, WI, USA

Regression methods, response surfaces

B. Efron

German Cancer Research Centre, Heidelberg, Germany

Biostatistics

M. Gilli

Stanford University, Stanford, CA, USA

Bayesian methods, bootstrap procedures

C.N. Lauro

University of Geneva, Geneva, Switzerland

Numerical methods with applications to statistics and econometrics, algorithms for statistical model selection techniques, heuristic

optimization methods in statistics, high performance computing

Università degli Studi di Napoli "Federico II", Napoli, Italy

Multidimensional data analysis, symbolic data analysis, structural equation models, statistical computing, application in marketing and

quality control

P. Naeve

University of Bielefeld, Bielefeld, Germany

Statistical computing

C.R. Rao

Pennsylvania State University, University Park, PA, USA

Theory and applications of statistics

Y. Tanaka

Nanzan University, Seto, Aichi, Japan

N. Victor

Multivariate analysis, sensitivity analysis, statistical computing

Ruprecht-Karls-Universität, Heidelberg, Germany

Methods and software for clinical trials, statistics in medicine contingency tables

E.J. Wegman

George Mason University, Fairfax, VA, USA

Nonparametric function estimation, time series methods, high interaction statistical graphics and methods, method for parallel
computation

Associate Editors

S.E. Ahmed

University of Windsor, Windsor, Canada

Statistical inference (parametric, non-parametric, more specifically, shrinkage, empirical Bayes, lasso and pretest estimation),
quality control, survival analysis, regression and multivariate analysis, generalized linear models

D.B. Allison

University of Alabama, Birmingham, AL, USA

Statistical genetics, statistical genomics, microarray research, proteomic research, obesity research

A. Amendola

University of Salerno, Fisciano, Italy

Time series, nonlinear models, forecasting, financial data analysis

J.L. Barlow

Pennsylvania State University, University Park, PA, USA

Least squares and eigenvalue computation, statistical applications in signal and image processing, numerical linear algebra and statistics

M.P. Brito

University of Porto, Porto, Portugal

Multivariate data analysis, cluster analysis, symbolic data analysis, data mining

M.J. Buckley

CSIRO, North Ryde, Australia

Image analysis, nonparametric regression, bioinformatics, spatial statistics

B. Caffo

Johns Hopkins University, Baltimore, MD, USA

Image analysis, permutation tests, high throughput data analysis, GLMM

H. Caussinus

Université Paul Sabatier, Toulouse, France

Multidimensional data analysis, graphical displays, contingency tables, qualitative data, linear models, model choice, dimensionality
reduction

C.-H. Chen

Institute of Statistical Science, Academia Sinica, NanKang, Taipei, Taiwan

Bioinformatics, data/information visualization, data mining, dimension reduction, and pattern recognition

|-------------------|--|
| V. Choulakian | Université de Moncton, Moncton, NB, Canada |
| A. Colubi | Contingency tables, two-way and three-way tables, internet data analysis, dimensionality reduction, goodness of fit tests
Universidad de Oviedo, Oviedo, Spain |
| R. Coppi | Fuzzy, symbolic and functional data analysis, nonparametric regression, goodness-of-fit and applied statistics
Università degli Studi di Roma “La Sapienza”, Rome, Italy |
| C. Croux | Multivariate data analysis, fuzzy analysis, data mining, latent component models, cluster analysis
Hogenhevelcollege, Leuven, Belgium |
| R. Davidson | Robust methods, exploratory data analysis, estimation in econometric models
McGill University, Montréal, Canada |
| I. Dewan | Bootstrap, hypothesis tests, stochastic dominance, econometric estimation
Indian Statistical Institute, New Delhi, India |
| P. Duchesne | Reliability and survival analysis, parametric and nonparametric inference for competing risks, load sharing models, coherent systems, associated (dependent) random variables
Université de Montréal, Montréal, Canada |
| V. Esposito Vinzi | Time series, econometrics, portmanteau test statistics, diagnostic checking, robustness, tests of independence, multivariate analysis, outliers, stochastic processes, wavelets
ESSEC Business School, Cergy-Pontoise, France |
| W. G. M. Maalampi | Multivariate analysis, exploratory data analysis, structural equation modeling, partial least squares, clustering and classification, applications to customer satisfaction and consumer preference studies
University of Jyväskylä, Jyväskylä, Finland |
| W. G. M. Maalampi | Applications to customer satisfaction and consumer preference studies
University of Jyväskylä, Jyväskylä, Finland |

D.S.G. Pollock	Queen Mary, University of London, London, UK Statistical analysis in the frequency domain, filtering methods, wavelets, econometric methods, time series analysis, functional analysis
C.E. Priebe	Johns Hopkins University, Baltimore, MD, USA Kernel and mixture estimates, statistical pattern recognition, statistical image analysis
E. Ruiz	Universidad Carlos III de Madrid, Spain Financial time series, stochastic volatility and GARCH models, unobserved component models, bootstrap procedures for forecasting, cointegration, robust procedures
Y.H. Said	Johns Hopkins University, Baltimore, MD, USA Biostatistics, epidemiology, public health, statistical modeling and graphics, adaptive design, social network theory, data mining, time series analysis, computer intrusion detection, climatology, metadata
M.G. Schimek	Medical University of Graz, Graz, Austria Environmental epidemiology, false discovery rate, generalized additive models, high-dimensionality, microarray meta-analysis
Y. Tamura	Institute of Statistical Mathematics, Tokyo, Japan Neural networks, parallel computing, time series analysis, random numbers, Monte Carlo simulation
M. Trosset	Indiana University, Bloomington, IN, USA Multidimensional scaling, dimension reduction, statistical learning, computer experiments, numerical optimization, stochastic optimization, response surface methodology
S. Van Aelst	Ghent University, Ghent, Belgium Robustness, outlier detection, model selection, clustering and pattern recognition, high dimensional data, dimension reduction, data mining
H.K. van Dijk	Erasmus University Rotterdam, Rotterdam, The Netherlands Bayesian computing, Monte Carlo simulation with MCMC, econometrics of growth, cycles and volatilities
P. Vieu	Université Paul Sabatier, Toulouse, France Functional estimation, smoothing, time series, dimensionality reduction, regression estimation
J. Whittaker	Lancaster University, Lancaster, UK Graphic modeling and conditional independence, traffic modeling, multivariate statistics
R. Wilcox	University of Southern California, Los Angeles, CA, USA Robust and nonparametric methods, general linear models
A.F.X. Wilhelm	International University, Bremen, Germany Data mining, interactive statistical graphics, computer intensive statistical methods
P. Winker	University of Giessen, Giessen, Germany Time series modeling, uniform design, optimization heuristics in statistics and econometrics
W.A. Woodward	Southern Methodist University, Dallas, TX, USA Time series analysis, robust estimation, testing for trend, mixture models
M. Xie	National University of Singapore, Singapore Statistical quality control, reliability analysis, lifetime distribution, software reliability
K.C. Yuen	The University of Hong Kong, Hong Kong, China Applications of computational methods to actuarial science, insurance risk modeling, investment risk analysis, survival analysis, goodness-of-fit test for semiparametric models via resampling methods
D. Zelterman	Yale University School of Medicine, New Haven, CT, USA Biostatistics

Associate Editors for Statistical Algorithms and Software

C. Gat	Université de Neuchâtel, Neuchâtel, Switzerland Algorithms for model selection, combinatorial algorithms, parallel computing
W.G. Gould	STATA Corporation, College Station, TX, USA Statistical Software: STATA
B.D. McCullough	Drexel University, Philadelphia, PA, USA Software reliability, applied econometrics, time series
C.R. Mehta	Cytel Software Corporation, Cambridge, MA, USA Statistical Software: CYTEL
R.W. Payne	VSN International, Hemel Hempstead, UK Design and analysis of experiments, generalized linear models, statistical computing, Statistical Software: GENSTAT
B. Rodriguez	SAS Institute, Cary, NC, USA Statistical Software: SAS
K. Weeks	SPSS Inc., Chicago, IL, USA Statistical Software: SPSS
A. Zeileis	Wirtschaftsuniversität Wien, Vienna, Austria R, statistical computing, applied econometrics, statistical learning

Editorial Board for the Statistical Software Newsletter (SSN) Website

A. Hörmann	(Managing Editor—IASC News and Calendar), GSF-Medis-Institut, Oberschleißheim, Germany
J.C. Niland	(Managing Co-Editor—IASC News), City of Hope National Medical Center, Duarte, CA, USA
A. Dagis	(CSDA_SSN Website Managers), University of Southern California, Los Angeles, CA, USA
J. Baurley	(CSDA_SSN Website Managers), University of Southern California, Los Angeles, CA, USA
T.T. Ge	(CSDA_SSN Website Managers), University of Southern California, Los Angeles, CA, USA

Editorial Assistants

Mary Trujillo	University of Southern California, Los Angeles, CA, USA
George Martinez	University of Southern California, Los Angeles, CA, USA
Valerie Molina	University of Southern California, Los Angeles, CA, USA
