- A - Form Level
- B - Main Menu
- C - Third-Party Form Level
- D - Third-Party Main Menu

Answer: A

Question: 5

In Modifier the user opens an existing data type "DDL._Country". This data type is a drop-down list containing 3 static text values. What options are available for customizing the static text values?

- A - Insert
- B - Remove

- C - Replace
- D - Edit

Answer: C

Question: 6

In Great Plains, formats are used to display data a particular way. For example a phone number could contain a format with and without an extension. Using Modifier which resource would be used to attach a format?

- A - Data Type
- B - Field
- C - Table
- D - Window

Answer: A

Question: 7

You would like to customize a window and have the window layout open in Modifier. Which window properties can be changed using Modifier?

- A - AutoOpen
- B - Title
- C - Name
- D - WindowID

Answer: A, B

Question: 8

Using Modifier how can multiple fields be selected within the window layout?

- A - Hold down the Control Key while clicking on the fields
- B - Hold down the Shift Key while clicking on the fields
- C - Hold down the Alt Key while clicking on the fields
- D - Lasso the fields using the mouse

Answer: A, B, D

Question: 9

In Great Plains scrolling windows are used to display multiple lines of information. What types of scrolling windows exist in the Great Plains application?

- A - Browse Only
- B - Editable
- C - Adds Allowed
- D - User Defined

Answer: A, B, C

Question: 10

In the Great Plains application, how can you visually identify that a window has been customized using Modifier?

- A - "Modified" is displayed at the top of the window
- B - "Modified" is displayed at the bottom of the window

- C - "Modified" appears after the title of the window
- D - A period appears before the title of the window

Answer: D

Question: 11

Global changes can be made to some resources in Great Plains. When a global change is made, this change affects the entire dictionary. Using Modifier, what type of resource can be customized with a global change?

- A - Pictures
- B - Data Types
- C - Tables
- D - Messages

Answer: A, B, D

Question: 12

In Modifier, how can you change the property of a field or a window using the Properties Window?

- A - Double-click on the property to change it's value
- B - Select a value from a list
- C - Edit Manually
- D - Field properties cannot be changed using Modifier

Answer: A, B, C

Question: 13

What allows you to create a window or dialog box in your VBA project?

- A - Module
- B - User Form
- C - Procedures
- D - Class Module

Answer: B

Question: 14

You are customizing a Great Plains window by adding VBA code. When debugging the code, which window would you open to display information for all objects on the current window?

- A - Immediate Window
- B - Locals Window
- C - Call Stack Window
- D - Watches Window

Answer: B

Question: 15

You are in the VBA code window writing code. After typing a valid object name, what can be used after typing the object name to display a drop-down list of methods and properties available for that object?

- A - comma

- B - period
- C - return
- D - tab

Answer: B

Question: 16

In the VBA options window you can mark an option called "Require Variable Declaration". If this option is marked what displays in the code window before any procedure?

- A - Option Explicit
- B - Explicit
- C - Implicit
- D - Force Explicit

Answer: A

Question: 17

You are customizing a Great Plains window by adding VBA code. You set a breakpoint to debug the code. Once stopped at a breakpoint, what command executes the code one line at a time?

- A - Continue
- B - Step Over
- C - Step Out
- D - Step Into

Answer: D

Question: 18

What variables can be used only by procedures in the same module?

- A - Public
- B - Private
- C - Explicit
- D - Static

Answer: B

Question: 19

You open a Great Plains window and want to customize it with VBA. The window that you opened is a Modal window. When a modal window is displayed, how can it be added to the VBA project?

- A - Tools - Customize - Add Current Window to Visual Basic
- B - Using the keyboard shortcut Ctrl + F11
- C - Modal Windows appear in the VBA project automatically
- D - Modal windows cannot be customized with VBA and cannot be added to the VBA project

Answer: B

Question: 20

You have added a Great Plains window and several fields to the VBA project. You realize that a few fields are not needed. How do you remove an individual field from the VBA project?

- A - From VBA highlight the field in the Project Explorer window and delete it
- B - From VBA highlight the field from the list in the Code Window and delete it
- C - From Great Plains choose Tools-Customize-Remove field from Visual Basic
- D - Individual fields cannot be removed from the VBA project

Answer: D

Question: 21

You are asked to customize the Payables Transaction Entry window by making the Shipping Method a required field. Using VBA code, which statement would accomplish this?

- A - ShippingWeight.Required = True
- B - ShippingWeight is Required
- C - Shipping Weight = Required
- D - Required.ShippingWeight = True

Answer: A

Question: 22

In VBA what method can be used to move the cursor to a specific field?

- A - Focus
- B - Move
- C - Focus Field
- D - Move Field

Answer: A

Question: 23

In VBA which property can be used to set the value of a field?

- A - Focus
- B - Value
- C - Set
- D - Caption

Answer: B

Question: 24

You have a need to hide the Great Plains Customer Maintenance window. The Customer Maintenance window has been added to the VBA project. Using VBA code, which VBA statements would accomplish this?

- A - CustomerMaintenance.Window.Visible = False
- B - CustomerMaintenance.Window.Hide
- C - CustomerMaintenance.Hide
- D - CustomerMaintenance.Visible = False

Answer: C, D

Question: 25

What happens if you don't have any Great Plains windows open and you choose Tools-Customize-Add? What happens if you do? Have any Great Plains windows open and you choose Tools-Customize-Add Current Window to Visual Basic?

- A - The Great Plains Toolbar is added to VBA
- B - You will receive a Dialog asking you to open a window
- C - You will receive a VBA error
- D - All Great Plains windows will be added to the VBA project

Answer: A

Question: 26

You have added a Great Plains window to the VBA project. You realize that the wrong window has been added. How do you remove a Great Plains window from the VBA Project?

- A - From VBA highlight the window in Project Explorer and delete it
- B - From Great Plains choose Tools-Customize-Remove Current Window from Visual Basic
- C - From VBA select the window, right click and choose delete
- D - Once added, Great Plains windows cannot be removed from the VBA project

Answer: B

Question: 27

You are customizing an original Great Plains window using VBA. You add the Great Plains window to the VBA project. How can you visually tell if the Great Plains window is part of the VBA project?

- A - In Great Plains, a period appears after the window title In Great Plains, a period appears after the window.
- B - In Great Plains, a period appears before and after the window title.
- C - The window display name is listed in the VBA Project Explorer Window.
- D - The window technical name is listed in the VBA Project Explorer Window.

Answer: A, C

Question: 28

You open the Purchase Order Entry window. After selecting a Vendor ID you would like to open the Purchasing Vendor Detail Entry window for the user. Which VBA statement would open this window using the indirect method?

- A - `PurchasingVendorDetailEntry.Open`
- B - `PurchaseOrderEntry.Open`
- C - `ExpansionButton4.Value = 1`
- D - `PurchasingVendorDetailEntry.Activate`

Answer: C

Question: 29

You are asked to customize the Payables Transaction Entry window and hide the Payment Terms field when the user selects "Return" in the Document Type field. Using VBA code, how many ways are there to hide the field?

- A - 1
- B - 2
- C - 3
- D - 4

Answer: A

Question: 30

Using VBA, how do you push a button on a Great Plains window?

- A - Set the value of the push button equal to 0
- B - Set the value of the push button equal to 1
- C - Use the Click Event
- D - Use the Initialize Event

Answer: B

Question: 31

In VBA what method should be used before updating the value of a field?

- A - Activate
- B - Focus
- C - Open
- D - Move

Answer: B

Question: 32

In Great Plains what actions performed by a user can cause the VBA modal dialog event to run for a window?

- A - Clicking the Browse Buttons
- B - Closing the Window
- C - Clicking the Delete Button
- D - Clicking the Save Button

Answer: A, B, C

Question: 33

Which type of scrolling window allows the user to edit existing data in the scrolling window?

- A - Browse Only
- B - Adds Allowed
- C - Editable
- D - Data cannot be changed in a scrolling window

Answer: B, C

Question: 34

In VBA, where are events listed?

- A - Project Explorer Window
- B - Toolbox
- C - Properties Sheet
- D - Code Window

Answer: D

Question: 35

You add the Transaction Entry window to the VBA project along with fields in the grid. Where would the fields added from the grid appear?

- A - In the Code Window for the Transaction Entry Detail Grid
- B - In the Project Explorer Window for the Transaction Entry Detail Grid
- C - In the Code Window for the Transaction Entry Window
- D - In the Project Explorer Window for the Transaction Entry Window

Answer: A

Question: 36

The Purchase Order Entry window has been added to the VBA project. Code exists on the afteruserchanged event for the Vendor ID field. Which actions performed by a user will cause the afteruserchanged event to run?

- A - Clicking on Browse Buttons
- B - Selecting a value from a Lookup Window
- C - Entering a new value in the field and moving focus out of the field
- D - Clicking on the Vendor ID Expansion Button

Answer: B, C

Question: 37

When adding fields to a VBA project from a Great Plains scrolling window, which statements are true?

- A - Fields can be added after the scrolling window is added to your VBA project
- B - Multiple fields can be selected and added at one time
- C - The same field must be added for each line in the scrolling window
- D - The scrolling window must be active before fields can be added

Answer: A, D

Question: 38

If you want to set a drop-down list to a specific value and you don't want Great Plains to overwrite your code what window event would you use?

- A - BeforeClose
- B - BeforeOpen
- C - AfterOpen
- D - AfterClose

Answer: C

Question: 39

In VBA which function is used to convert a string to a currency data type?

- A - CCur()
- B - CInt()
- C - CDate()
- D - CLng()

Answer: A

Question: 40

You've created some VBA customizations and are ready to distribute them to the end users. Which file will you give to the end users?

- A - Package file
- B - Forms.dic
- C - Reports.dic
- D - Dynamics.vba

Answer: A

Question: 41

You have created a customization using Modifier and VBA on a workstation. You would like to use the customizations on another workstation so you create a package file. Importing the package on another workstation will affect which of the following?

- A - The Dynamics.vba file
- B - Dynamics.set
- C - Security
- D - The Forms.dic

Answer: A, D

Question: 42

If DUOS tables were used in the VBA project, when distributing where do the DUOS tables need to exist?

- A - In the same location as the Dynamics.dic
- B - In the same location as the Dynamics.set file
- C - In the same location as the System files
- D - In the same location as the Company files

Answer: D

Question: 43

When working with multiple VBA projects, what needs to be done in order to reference fields from one project to another?

- A - Mark a circular reference between the projects
- B - The same object must be added to each project
- C - Mark a reference from one project to another
- D - When referencing the object in the code window, the object must be fully qualified

Answer: C, D

Question: 44

You are the developer in your company and are in charge of implementing customizations and upgrades to end users. A new version of Great Plains is released. After installing the new version of Great Plains, you open the VBA application and verify the customizations still work. A change to the VBA file is needed and is made now you need to deliver this change to the end users. What type of file do you give the end users?

- A - Configuration File
- B - Chunk File
- C - Service Pack
- D - Package File

Answer: D

Question: 45

In Report writer, which field type has the suffix FREQ appended to it when added to the VBA project?

- A - Control Count
- B - Count
- C - Sum
- D - Average

Answer: B

Question: 46

What code would be used to update the DUOS table with the value of the Email Address field on the window?

- A - CustomerObject.Properties ("Email Address") = EmailAddress
- B - CustomerObject.Properties (EmailAddress) = "Email Address"
- C - EmailAddress = CustomerObject.Properties ("Email Address")
- D - "Email Address" = CustomerObject.Properties (EmailAddress)

Answer: A

Question: 47

In Report Writer, which field can be used to print information from the DUOS table?

- A - DUOS table fields
- B - Global Fields
- C - Calculated Fields
- D - Legend Fields

Answer: C

Question: 48

When working with DUOS objects, what would the "for" and "next" statement do?

- A - Change multiple objects in the DUOS table
- B - Change one object in the DUOS table
- C - Change multiple objects in the collection
- D - Change one object in the collection

Answer: C

Question: 49

What must be done before data can be accessed using ODBC?

- A - Install the ODBC Drivers
- B - Install the Data Access Method
- C - Define the connection
- D - Mark the required variable declaration option

Answer: A, B, C

Question: 50

Graphical objects are used throughout the Great Plains application. In Modifier, what type of resource can be used to display graphical objects?

- A - String
- B - Picture
- C - Push Button
- D - Message

Answer: B, C

Question: 51

The Great Plains Application contains several tables. Tables can be attached to forms and autolinked to windows. How many auto-linked tables can exist for each window?

- A - 1
- B - 2
- C - 3
- D - unlimited

Answer: A

Question: 52

Which of the following registered modules allow customized windows to be used in Great Plains?

- A - Great Plains Software Development Kit
- B - Customization Site Enabler
- C - Modifier
- D - Integration Site Enabler

Answer: B, C

Question: 53

With the Load Statement, the object is placed in memory, but isn't visible. In order to make the object visible, you would use what method?

- A - Unload
- B - Show
- C - Hide
- D - Focus

Answer: B

Question: 54

You need to customize the original Item Maintenance Great Plains window using VBA. The VBA code you write will need to reference the Item Number field from that window. What steps will allow access to the Item Number?

- A - Add the Item Maintenance window to VBA
- B - Mark a reference to the Item Maintenance Window
- C - Mark a reference to Great Plains
- D - Add the Item Number field to VBA

Answer: A, D

Question: 55

You have added a Great Plains window to the VBA project. You also need to add several fields from that window. How do you add multiple fields to VBA?

- A - Lasso the fields that you want to add. Choose Tools-Customize-Add fields to Visual Basic
- B - Lasso the fields you want to add. Choose Tools-Customize-Add Multiple fields to Visual Basic
- C - Select multiple fields using the Shift Key. Once they are selected choose Tools-Customize-Add fields to Visual Basic
- D - Choose Tools-Customize-Add fields to Visual Basic. Click on each field you want to add

Answer: D

Question: 56

In VBA which event can be used to stop Great Plains code from executing and saving line information to the table?

- A - BeforeLineChange
- B - BeforeLinePopulate
- C - BeforeLineGotFocus
- D - BeforeLineLostFocus

Answer: A

Question: 57

The user adds VBA code in the BeforeGotFocus event for a field. In the code, the CancelLogic parameter is used. What does the CancelLogic parameter do?

- A - Stops the VBA window from closing
- B - Stops the Great Plains window from closing
- C - Stops the VBA code for the field from executing
- D - Stops the Great Plains code for the field from executing

Answer: D

Question: 58

In VBA which event can be used to keep records from entering the grid?

- A - BeforeLineChange
- B - BeforeLinePopulate
- C - BeforeLineGotFocus
- D - BeforeLineLostFocus

Answer: B

Question: 59

Within VBA, what are scrolling windows called?

- A - Scrolling Windows
- B - Windows
- C - Grids
- D - Scrolling Window Grids

Answer: C

Question: 60

When working with Great Plains scrolling windows, which statement is true?

- A - Only fields on the current line can be referenced
- B - Fields from more than one line can be referenced

- C - You can work with specified rows and columns within a scrolling windows
- D - Field values in a scrolling window cannot be changed

Answer: A

Question: 61

In VBA what needs to be done in order to use DUOS methods and properties?

- A - Declare the collection
- B - Declare the object
- C - Mark the Required Declaration Option
- D - Mark a reference to the DUOS tables

Answer: A, B

Question: 62

How are upgrades to the Great Plains application released?

- A - Package Files
- B - Services Packs
- C - Major Releases
- D - None of the above

Answer: B, C

Question: 63

Using VBA, what type of events exist for Great Plains reports?

- A - Start Events
- B - End Events
- C - Band Events
- D - Field Events

Answer: A, B, C

Question: 64

When exporting data from Great Plains to a mail merge, what is true about the data source?

- A - A new data source must always be created
- B - An existing data source can be used
- C - The data source can be an excel document
- D - The data source can be a text file

Answer: B, C, D

Question: 65

You are asked to modify a Great Plains window by adding fields to it. Using Modifier, what type of fields can be added?

- A - Local Fields
- B - Fields from any table attached to the form
- C - Fields from the auto-linked table
- D - Fields from the table created by the user

Answer: A, C

Question: 66

Declaring variables before using them in your code is recommended. Doing this alleviates incorrect names of a variables when writing code and the scope of the variable can also be defined. In the VBA options window you can mark an option called "Require Variable Declaration". If this option is marked what displays in the code window before any procedure?

- A - Option Explicit
- B - Explicit
- C - Implicit
- D - Force Explicit

Answer: A

Question: 67

Using VBA code, how do you verify if a window is open?

- A - IsOpen Method
- B - IsLoaded Method
- C - IsOpen Property
- D - IsLoaded Property

Answer: D

Question: 68

In the VBA Properties window what options are listed for the EventMode property?

- A - emOriginalonly
- B - emAlways
- C - emMudifiedOnly
- D - emNever

Answer: A, C, D

Question: 69

In VBA what window event can be used to check which button the user pushed on a modal dialog message?

- A - AfterModalDailog
- B - BeforeModalDialog
- C - AfterClose
- D - BeforeClose

Answer: A
