No Pass No Pay!

**MCSE, CCNA, CCNP, OCP, CIW, JAVA, Sun Solaris, Checkpoint
World No 1 Cert Guides**

**Great Plains 8.0 Integration Manager
MB3-215**

Congratulations!

You have purchased a TestKingonline. Study Guide.

This study guide is a complete collection of questions and answers that have been developed by our professional & certified team. You must study the contents of this guide properly in order to prepare for the actual certification test. The average time that we would suggest you for studying this study guide is approximately 10 to 20 hours and you will surely pass your exam. We guarantee it!

GOOD LUCK!

Total No of Questions:-151

Question: 1

Which of the following is a resource that may be useful in setting up an import?

- A - Software Development Kit
- B - Resource Descriptions
- C - Microsoft SQL Query Analyzer
- D - SQL Books Online

Answer: A, B, C

Question: 2

What tables contain the Import Definitions?

- A - SY50000.idx and SY50000.dat
- B - SY50100.idx and SY50100.dat
- C - SY60000.idx and SY60000.dat
- D - SY50001.idx and SY50001.dat

Answer: A, B

Question: 3

What file format does Import Utility support?

- A - Tab Delimited file
- B - SQL database
- C - Comma Delimited file
- D - All of the Above

Answer: A, C

Question: 4

Which of the following capabilities does Import Utility possess?

- A - Insert New Records
- B - Update Existing Records
- C - Both Insert and Update
- D - Neither, it is a read-only tool

Answer: A

Question: 5

When importing General Journal Transactions with Import Utility, which tables would be required?

- A - GL00100
- B - GL10000
- C - GL10001
- D - GL00105

Answer: B, C

Question: 6

When using the Import Utility, what will happen to invalid data types?

- A - Rejected
- B - Converted and truncated
- C - Ignored
- D - Translated based on your setup

Answer: B

Question: 7

VB scripts can be attached at which of the following levels?

- A - Integration Level
- B - Field Level
- C - Translation Level
- D - Source Level

Answer: A, B, D

Question: 8

Which of the following operating systems are not compatible with Integration Manager Version 8.0?

- A - Windows 98/98 SE
- B - Windows 95
- C - Windows 2000
- D - Windows XP

Answer: A, B

Question: 9

When creating a Simple ODBC query to access an Excel spreadsheet, what step must be done in Excel in order to see the data?

- A - Give the spreadsheet a name that matches the query name
- B - Define a named range within the spreadsheet
- C - Format the spreadsheet as a general format
- D - The first Excel row must have column names

Answer: B

Question: 10

It integration is run and a user does not have rights to the window, will the integration fail?

- A - No, the Great Plains 8.0 adapter integrates at the table level
- B - Yes, the Great Plains 8.0 adapter is a macro interlace integration, thus a user needs permission at the window level
- C - No, it depends on the database version you are using
- D - No, any user with rights to Integration Manager has rights to the windows

Answer: B

Question: 11

As the lead integration developer, you would like to streamline some of your integrations using the Script Library. In reviewing your current integrations, you determine that which of the following tasks can be completed using a script from the Script Library?

- A - Concatenating two or more source fields
- B - Prompting the user for a batch ID
- C - Creating a header file with summary information
- D - Renaming a source file using today's date

Answer: A, B, D

Question: 12

You have one source file. In order to integrate a journal entry into the General Ledger, what must you specify in the header source so that each row isn't brought over as a separate journal entry?

- A - Order by on the column that is the same value for each row
- B - Group by on the column that is the same value for each row
- C - Check the is Key box on the column that is the same value for each row
- D - Set the datatype of the Journal Entry number as String

Answer: B

Question: 13

If you do NOT mark First Row Contains Column Names in the Source properties, what default names are assigned?

- A - Column1, Column2, Column3, etc.
- B - Name1, Name2, Name3, etc.
- C - F1, F2, F3, etc.
- D - None of the Above

Answer: C

Question: 14

Which of the following can be specified for the Log Level of detail?

- A - Database
- B - File
- C - None
- D - Trace

Answer: C, D

Question: 15

Which of the following destinations will allow you to update existing records in Great Plains?

- A - Accounts and General Ledger Transactions
- B - Customers and Cash Receipts
- C - All Master Record integrations and the Exchange Rate integration
- D - Payroll Transaction integrations

Answer: C

Question: 16

In each source, you can set to order by a column in what order?

- A - Ascending
- B - Descending
- C - Chronological Date
- D - None of the Above

Answer: A, B

Question: 17

Which of the following types of translations can be created?

- A - Universal Translation
- B - Global Translation
- C - Local Translation
- D - Fixed Translation

Answer: B, C

Question: 18

What fields are required, or do not have the option to use default, when running a GL Accounts integration?

- A - Account Number, Description, Posting Type

- B - Account Number, Category, Posting Type
- C - Account Number, Description, Category
- D - Account Number, Category, Typical Balance

Answer: C

Question: 19

What is the minimum amount of queries needed for a Payroll Transaction Integration?

- A - None
- B - 1
- C - 2
- D - 3

Answer: C

Question: 20

Which of the following are sources for the Great Plains 8.0 standard adapter?

- A - XML
- B - Fixed width file
- C - Simple ODBC
- D - Excel 5.0 or higher file

Answer: A, C

Question: 21

When bringing in Exchange Rate information using the Exchange Rate destination, which of the following statements is true?

- A - You can create the Exchange Table ID on-the-fly.
- B - The currency id is required and must be specified in the integration.
- C - The Exchange Table ID must already exist.
- D - You can change the currency id assigned to an existing Exchange Table.

Answer: C

Question: 22

There are multiple ways to add a Source Query to integration. Which of the following is NOT a method to add a Source?

- A - Select File -Add Source
- B - Click the Add Source button
- C - Select Integration from the main menu and choose Add Source
- D - Use the Ctrl+A key combination

Answer: A

Question: 23

If the user wishes to only integrate transactions for a certain date, what would be the best way to limit the data?

- A - Local Translation
- B - Global Translation
- C - Row Restriction
- D - Order By

Answer: C

Question: 24

As a Technical Support Assistant, you have been asked to install Integration Manager with all possible adapters. Which of the following adapters are not included in the Integration Manager installation and must be installed separately?

- A - Project Accounting Timesheets
- B - Fixed Assets General Asset Information
- C - Sales Order Processing Sales Transaction
- D - Human Resources Training

Answer: A, B

Question: 25

Which of the following is an available Storage Type for the Integration Log?

- A - File
- B - Database
- C - Spreadsheet
- D - XML

Answer: A, B

Question: 26

When Integration Group is run, where would you go to see the log file for the integration group?

- A - In the Integration Group properties window - Log tab
- B - In the Object Browser
- C - Under Tools-Options - Group Log
- D - Open each integration separately and go to the properties window? Log tab

Answer: D

Question: 27

What of the following information can NOT be integrated on Sales Order Processing Order integration with the Great Plains 8.0 standard adapter?

- A - A different ship to address id for each line item.
- B - Lot and serial numbers for line items.
- C - Recurring Order information
- D - Line Item Distribution Accounts

Answer: C

Question: 28

When integrating Customers, what are the available Destination Edit Modes?

- A - Insert Only
- B - Update Only
- C - Insert and Update
- D - Update Existing Records Only

Answer: A, B, C

Question: 29

Where can you delete integration?

- A - Under Tools - Options
- B - Object Browser
- C - Within the open Integration window
- D - Under File -Delete Integration

Answer: B, C

Question: 30

Payables Transaction integration has been created. It is based on one source file that includes debit and credit distributions. When run, only one distribution account is integrated. What should be checked to resolve this problem?

- A - Two source queries are required: One for transaction information and one for distribution information.
- B - The transaction information source query must be sorted by the same field used in the query relationship.
- C - The relationship between the source queries needs to be pointing from the transaction (header) source query to the distribution (detail) source query.
- D - In the Destination Mapping, click on the Entries collection and then the Options tab. Check to make sure the Source column is referencing detail source query' and not the header source query.

Answer: A, C, D

Question: 31

Before running integration with the Great Plains 8.0 adapter, do you have to be logged into the Great Plains Company you would like to integrate to?

- A - Yes
- B - No, it integrates into the last company that was logged into
- C - No, you specify the company in the integration
- D - No, the integration properties include a company database setting

Answer: A

Question: 32

What is NOT one of the benefits of using the Integration Manager Great Plains 8.0 adapter?

- A - Data is validated before entering the system
- B - You can integrate into any destination
- C - You can update Master tables
- D - Data can be filtered or restricted before integrating

Answer: B

Question: 33

Cash Receipts are being integrated and applied to Invoices. When looking at the Apply Sales Document window, nothing is applied. What should be checked to resolve this?

- A - The invoices (or debit documents) must be unposted, and saved to batches.
- B - In the Destination Mapping, click on the Cash Apply collection and then the Options tab. Check to make sure the Rule column is marked to Use Source Record set.
- C - The invoices (or debit documents) must be posted
- D - The invoices (or debit documents) must be sitting in the PM Open table

Answer: B, C, D

Question: 34

Each field that has their Field Rule set to use Source Field will display additional settings under the Rule Properties section. The settings include which of the following options?

- A - Translation
- B - Use System Date
- C - If Null
- D - Case Conversion

Answer: A, C, D

Question: 35

What are the three types of sources available with the standard installation?

- A - Text, Simple ODBC, Advanced ODBC
- B - Text, Simple ODBC, XML
- C - Text Advanced ODBC XML
- D - Simple ODBC, Advanced ODBC, XML

Answer: A

Question: 36

What is the default value for maximum number of errors Integration Manager allows before the integration is stopped?

- A - 1
- B - 5
- C - 10
- D - 25

Answer: C

Question: 37

Where can you change the maximum number of errors and warnings?

- A - In the Relationships window
- B - In the Source Properties
- C - In the Object Browser
- D - In the Integration Properties

Answer: D

Question: 38

Which of the following destinations are available with the Great Plains 8.0 standard adapter?

- A - Bank Reconcile
- B - Purchase Order Transaction
- C - Invoicing Transaction
- D - Unit Accounts

Answer: A, D

Question: 39

Which of the following items does the IM.MDB contain?

- A - Translation information
- B - Data source information

- C - Great Plains user information
- D - Log information

Answer: A, B, D

Question: 40

As a Technical Support Engineer, you have been asked to create integration from your sales system into Sales Order Processing in Great Plains. Since you have significant transaction volume each day, you have decided to use the SQL Optimized Adapter to increase performance. What information would you need to set up the SQL Optimized Adapter?

- A - DSN
- B - Password
- C - Database ID
- D - SQL Server Name

Answer: A, B, C

Question: 41

The Direct to Table Adapter integrates at what level?

- A - Window level
- B - Business logic level
- C - Database level
- D - All of the Above

Answer: C

Question: 42

There are limitations to the Receiving Transaction integration using the SQL Optimized Adapter. Which of the following is NOT a limitation?

- A - Multicurrency transactions are not supported.
- B - Vendor Summary information is not updated automatically during integration.
- C - Sales Document Commitments are not supported
- D - Shipment/Invoice document types cannot be entered

Answer: D

Question: 43

How do you change the company to which records are going to be integrated when using the SQL Optimized Adapter?

- A - Change only the Company Database on the Destination Settings of the integration.
- B - Change only the Company that you are logged into when the integration is running.
- C - Change both the Company Database on the Destination Settings and the Company that you

are logged into.

D - It is not possible to change the company for an existing integration. A new integration would have to be created.

Answer: A

Question: 44

When you create a custom destination with the Direct to Table Adapter Custom Destination Designer tool, all tables associated with the DSN will be displayed. How would you remove a table?

- A - Highlight the table and hit the Delete button
- B - Highlight the table and right click
- C - Drag the table off of the window
- D - Right click on the DSN name and choose Delete Table

Answer: B

Question: 45

Which of the following is NOT a benefit of using the Direct to Table Adapter?

- A - You can import from a text or ODBC source
- B - Data is full validated
- C - You can import data into applications that don't have defined Integration Manager Destinations.
- D - You can default in Required Fields

Answer: B, D

Question: 46

With the XML Source Adapter, after you select the XML data file you wish to import from, the Source Settings window appears. The Source Settings window contains which of the following settings?

- A - The File path
- B - Filter
- C - Use Filter
- D - Password

Answer: A, B, C

Question: 47

XML is an abbreviation for?

- A - Extensible Markup Language
- B - External Markup Language
- C - External Migration Language

D - Extensible Media Language

Answer: A

Question: 48

With Integration Manager, you have the ability to do which of the following using XML?

A - Integrate into a Great Plains destination from an XML source

B - Integrate into an XML destination from a tab delimited source

C - Use XML as both a source and a destination

D - XML is not an option with Integration Manager

Answer: A, B, C

Question: 49

To create a custom destination, you would use the Direct to Table Custom Destination Designer.

How do you start the tool?

A - Double-click the IMDTT.exe file found in the IM\Tools\DirectToTable folder

B - Open Integration Manager and go to Tools - Options

C - Open Integration Manager and click on the Objects button

D - Double-click the IMDOTOOL.exe file found in the IM\Adapters\DirectToTable Destination 6.0 folder

Answer: D

Question: 50

Which of the following should be done when troubleshooting a problematic SQL Server connection when using the SQL Optimized Adapter?

A - Verify the SQL Server is running.

B - Be sure the DSN with the appropriate name has been setup on the workstation where the integration is being run.

C - Confirm the login and password is correct for the SQL Server.

D - Make sure that Great Plains is running.

Answer: A, B, C

Question: 51

When using the Import Utility, what will happen to invalid data types?

A - Rejected

B - Converted and truncated

C - Ignored

D - Translated based on your setup

Answer: B

Question: 52

Which of the following is considered a Non-window field?

- A - Sequence Line field
- B - Batch Number field
- C - Account Number field
- D - Journal Entry field

Answer: A

Question: 53

Which of the follow circumstances will cause Import Utility to reject records?

- A - You haven't specified a value for a required field
- B - The source file contains column headings
- C - Records are duplicates of records that already exist in the table
- D - Key fields are in lowercase

Answer: C

Question: 54

What file format does Import Utility support?

- A - Tab Delimited file
- B - SQL database
- C - Comma Delimited file
- D - All of the Above

Answer: A, C

Question: 55

Once you have created an import definition, which of the following is true?

- A - You can use that import only for the Company you created it in
- B - You can use that import for any Company
- C - You can use that import only for the sample company
- D - You must be logged in as Administrator to run the import

Answer: B

Question: 56

When importing General Journal Transactions with Import Utility, which tables would be required?

- A - GL00100
- B - GL10000

C - GL10001
D - GL00105

Answer: BC

Question: 57

Payables Transaction integration has been created. It is based on one source file that includes debit and credit distributions. When run, only one distribution account is integrated. What should be checked to resolve this problem?

- A. Two source queries are required: One for transaction information and one for distribution information.
- B. The transaction information source query must be sorted by the same field used in the query relationship.
- C. The relationship between the source queries needs to be pointing from the transaction (header) source query to the distribution (detail) source query.
- D. In the Destination Mapping, click on the Entries collection and then the Options tab. Check to make sure the Source column is referencing detail source query and not the header source query.

Answer: A, C, D

Question: 58

As a Technical Support Assistant, you have been asked to install Integration Manager with all possible adapters. Which of the following adapters are not included in the Integration Manager installation and must be installed separately?

- A - Project Accounting Timesheets
- B - Fixed Assets General Asset Information
- C - Sales Order Processing Sales Transaction
- D - Human Resources Training

Answer: A, B

Question: 59

Before running integration with the Great Plains 8.0 adapter, do you have to be logged into the Great Plains Company you would like to integrate to?

- A - Yes
- B - No, it integrates into the last company that was logged into
- C - No, you specify the company in the integration
- D - No, the integration properties include a company database setting

Answer: A

Question: 60

When creating a Simple ODBC query to access an Excel spreadsheet, what step must be done in Excel in order to see the data?

- A. Give the spreadsheet a name that matches the query name
- B - Define a named range within the spreadsheet
- C - Format the spreadsheet as a general format
- D - The first Excel row must have column names

Answer: B

Question: 61

Relationships between text sources must meet which of the following criteria?

- A - Must be between fields of the same data type
- B - Must be between fields with the same maximum number of characters
- C - Must be defined before destination mapping
- D - Relationships are not create between text sources

Answer: A

Question: 62

Data types can be changed within Integration Manager for which source type?

- A - Simple ODBC source
- B - Advanced ODBC source
- C - Text source
- D - All of the above

Answer: B, C

Question: 63

Which of the following destinations will allow you to update existing records in Great Plains?

- A - Accounts and General Ledger Transactions
- B - Customers and Cash Receipts
- C - All Master Record integrations and the Exchange Rate integration
- D - Payroll Transaction integrations

Answer: C

Question: 64

Which of the following destinations are available with the Great Plains 8.0 standard adapter?

- A - Bank Reconcile
- B - Purchase Order Transaction
- C - Invoicing Transaction

D - Unit Accounts

Answer: A, D

Question: 65

You have one source file. In order to integrate a journal entry into the General Ledger, what must you specify in the header source so that each row isn't brought over as a separate journal entry?

A - Order by on the column that is the same value for each row

B - Group by on the column that is the same value for each row

C - Check the is Key box on the column that is the same value for each row

D - Set the datatype of the Journal Entry number as String

Answer: B

Question: 66

In each source, you can set to order by a column in what order?

A - Ascending

B - Descending

C - Chronological Date

D - None of the Above

Answer: A, B

Question: 67

Which of the following can be specified for the Log Level of detail?

A - Database

B - File

C - None

D - Trace

Answer: C, D

Question: 68

Where can you delete integration?

A - Under Tools - Options

B - Object Browser

C - Within the open Integration window

D - Under File -Delete Integration

Answer: B, C

Question: 69

Which script event is the last to run when integration is run?

- A - After Document script
- B - After Integration script
- C - After Source script
- D - Field level script

Answer: C

Question: 70

What of the following information can NOT be integrated on Sales Order Processing Order integration with the Great Plains 8.0 standard adapter?

- A - A different ship to address id for each line item.
- B - Lot and serial numbers for line items.
- C - Recurring Order information
- D - Line Item Distribution Accounts

Answer: C

Question: 71

Which of the following setup destinations are available to integrate into with the Great Plains 8.0 adapter?

- A - Tax Details
- B - Exchange Rate
- C - Shipping Methods
- D - Payment Terms

Answer: B

Question: 72

Which of the following is not a Great Plains 8.0 destination adapter?

- A - Currency Accounts
- B - Variable Allocation Accounts
- C - Unit Accounts
- D - Payroll Manual Checks

Answer: A

Question: 73

What is the default value for maximum number of errors Integration Manager allows before the integration is stopped?

- A - 1
- B - 5

- C - 10
- D - 25

Answer: C

Question: 74

Which of the following actions is a required step to schedule an integration to run?

- A - Create a Great Plains Login Macro
- B - Create a BAT tile to run integration
- C - Create a macro to log out of Great Plains
- D - Create a BAT file to launch Great Plains

Answer: A, B, D

Question: 75

Cash Receipts are being integrated and applied to Invoices. When looking at the Apply Sales Document window, nothing is applied. What should be checked to resolve this?

- A - The invoices (or debit documents) must be unposted, and saved to batches.
- B - In the Destination Mapping, click on the Cash Apply collection and then the Options tab. Check to make sure the Rule column is marked to Use Source Record set.
- C - The invoices (or debit documents) must be posted
- D - The invoices (or debit documents) must be sitting in the RM Open table

Answer: B, C, D

Question: 76

Which of the following Master records can be updated with the Great Plains 8.0 standard adapter?

- A - Fixed Allocation Accounts
- B - Unit Accounts
- C - Item Resource Planning Maintenance
- D - Customers

Answer: A, B, D

Question: 77

Which of the following types of translations can be created?

- A - Universal Translation
- B - Global Translation
- C - Local Translation
- D - Fixed Translation

Answer: B, C

Question: 78

As the lead integration developer, you would like to streamline some of your integrations using the Script Library. In reviewing your current integrations, you determine that which of the following tasks can be completed using a script from the Script Library?

- A - Concatenating two or more source fields
- B - Prompting the user for a batch ID
- C - Creating a header file with summary information
- D - Renaming a source file using today's date

Answer: A, B, D

Question: 79

Integration Manager can add a Batch ID for transaction integration. To do so, in the destination mapping options tab, which option must be set?

- A - Create New Batch - True
- B - Create New Batch - Yes
- C - Add New Batch- True
- D - Missing Batch - Add New Batch

Answer: D

Question: 80

When bringing in Exchange Rate information using the Exchange Rate destination, which of the following statements is true?

- A - You can create the Exchange Table ID on-the-fly.
- B - The currency id is required and must be specified in the integration.
- C - The Exchange Table ID must already exist.
- D - You can change the currency id assigned to an existing Exchange Table.

Answer: C

Question: 81

As a Technical Support Engineer, you have been asked to create integration from your sales system into Sales Order Processing in Great Plains. Since you have significant transaction volume each day, you have decided to use the SQL Optimized Adapter to increase performance. What information would you need to set up the SQL Optimized Adapter?

- A - DSN
- B - Password
- C - Database ID
- D - SQL Server Name

Answer: A, B, C

Question: 82

What is the default Relationship Type?

- A - There can be 0 or 1 record in the child for each record in the master
- B - There must be exactly 1 record in the child for each record in the master
- C - There can be 0 or more records in the child for each record in the master
- D - There must be at least 1 record in the child for each record in the master

Answer: C

Question: 83

On General Ledger Account integration, which of the following is acceptable for the Account Category field?

- A - The name associated with the Account Category, case insensitive, e.g. cash.
- B - The number associated with the Account Category in the GL00102, e.g. 15.
- C - The name associated with the Account Category, case sensitive, e.g. Cash.
- D - The name or number associated with the Account Category

Answer: C

Question: 84

What is the minimum amount of queries needed for a Payroll Transaction Integration?

- A - None
- B - 1
- C - 2
- D - 3

Answer: C

Question: 85

Which of the following items does the IM.MDB contain?

- A - Translation information
- B - Data source information
- C - Great Plains user information
- D - Log information

Answer: A, B, D

Question: 86

Which of the following are sources for the Great Plains 8.0 standard adapter?

- A - XML
- B - Fixed width file
- C - Simple ODBC
- D - Excel 5.0 or higher file

Answer: A, C

Question: 87

What are the three types of sources available with the standard installation?

- A - Text, Simple DDBC, Advanced ODBC
- B - Text, Simple ODBC, XML
- C - Text, Advanced ODBC, XML
- D - Simple ODBC, Advanced ODBC, XML

Answer: A

Question: 88

Each field that has their Field Rule set to use Source Field will display additional settings under the Rule Properties section. The settings include which of the following options?

- A - Translation
- B - Use System Date
- C - If Null
- D - Case Conversion

Answer: A, C, D

Question: 89

In order to run integration with the Great Plains 8.0 standard adapter, the following is true:

- A - You must be logged in as the Administrator
- B - An ODBC data source must be setup to access the appropriate tables on the SQL server
- C - You must be logged into a Great Plains company
- D - None of the Above

Answer: C

Question: 90

If integration is run and a user does not have rights to the window, will the integration fail?

- A - No, the Great Plains 8.0 adapter integrates at the table level
- B - Yes, the Great Plains 8.0 adapter is macro interface integration, thus a user needs permission at the window level
- C - No, it depends on the database version you are using

D - No, any user with rights to Integration Manager has rights to the windows

Answer: B

Question: 91

XML is an abbreviation for?

- A - Extensible Markup Language
- B - External Markup Language
- C - External Migration Language
- D - Extensible Media Language

Answer: A

Question: 92

Which of the following is NOT a benefit of using the Direct to Table Adapter?

- A - You can import from a text or ODBC source
- B - Data is full validated
- C - You can import data into applications that don't have defined Integration Manager Destinations.
- D - You can default in Required Fields

Answer: B, D

Question: 93

Which of the following should be done when troubleshooting a problematic SQL Server connection when using the SQL Optimized Adapter?

- A - Verify the SQL Server is running.
- B - Be sure the DSN with the appropriate name has been setup on the workstation where the integration is being run.
- C - Confirm the login and password is correct for the SQL Server.
- D - Make sure that Great Plains is running.

Answer: A, B, C

Question: 94

In order to improve performance, you would want to use what kind of importing option with the Direct to Table Adapter?

- A - Import directly into an ODBC data source
- B - Import into any ODBC data source that was created within Integration Manager
- C - Import into a custom destination
- D - All of the above

Answer: C

Question: 95

If you attempting to perform a Sales Order Processing transaction integration with Integration Manager Version 8.0, which of the following would never be a selection available when adding a source?

- A - XML
- B - VB Script
- C - ODBC
- D - Text

Answer: B

Question: 96

How do you change the company to which records are going to be integrated when using the SQL Optimized Adapter?

- A - Change only the Company Database on the Destination Settings of the integration.
- B - Change only the Company that you are logged into when the integration is running.
- C - Change both the Company Database on the Destination Settings and the Company that you are logged into.
- D - It is not possible to change the company for an existing integration. A new integration would have to be created.

Answer: A

Question: 97

To create a custom destination, you would use the Direct to Table Custom Destination Designer. How do you start the tool?

- A - Double-click the IMDTT .exe file found in the IM\Tools\DirectToTable folder
- B - Open Integration Manager and go to Tools - Options
- C - Open Integration Manager and click on the Objects button
- D - Double-click the IMDOTOOL.exe file found in the IM\Adapters\DirectToTable Destination 6.0 folder

Answer: D

Question: 98

What are the available document types when integrating Sales Order Processing Transactions with the SQL Optimized Adapter?

- A - Orders, Invoices and Returns
- B - Orders and Invoices
- C - Quotes, Orders and Invoices
- D - Backorders and Orders

Answer: B

Question: 99

The Direct to Table Adapter integrates at what level?

- A - Window level
- B - Business logic level
- C - Database level
- D - All of the Above

Answer: C

Question: 100

Where should security privileges be setup to add data to the appropriate tables on the SQL Server when using the SQL Optimized Adapter?

- A - On the SQL Server
- B - In Great Plains under Setup > System > Security
- C - In the Integration Properties
- D - None of the Above

Answer: A

Question: 101

Which of the following is a resource that may be useful in setting up an import?

- A - Software Development Kit
- B - Resource Descriptions
- C - Microsoft SQL Query Anal, zer
- D - SQL Books Online

Answer: A, B, C

Question: 102

What file format does Import Utility support?

- A - Tab Delimited file
- B - SQL database
- C - Comma Delimited file
- D - All of the Above

Answer: A, C

Question: 103

What tables contain the Import Definitions?

- A - SY50000.idx and SY50000.dat
- B - SY50100.idx and SY50100.dat

C - SY60000.idx and SY60000.dat
D - SY50001.idx and SY50001.dat

Answer: A, B

Question: 104

Which of the following is considered a Non-window field?

- A - Sequence Line field
- B - Batch Number field
- C - Account Number field
- D - Journal Entry field

Answer: A

Question: 105

Which of the following types of tables are NOT recommended as an import destination with Import Utility?

- A - Open Tables
- B - Work Tables
- C - History Tables
- D - Master Tables

Answer: A, C

Question: 106

When using the Import Utility, what will happen to invalid data types?

- A - Rejected
- B - Converted and truncated
- C - Ignored
- D - Translated based on your setup

Answer: B

Question: 107

What fields are required, or do not have the option to use default, when running a GL Accounts integration?

- A - Account Number, Description, Posting Type
- B - Account Number, Category, Posting Type
- C - Account Number, Description, Category
- D - Account Number, Category, Typical Balance

Answer: C

Question: 108

Which of the following destinations will allow you to update existing records in Great Plains?

- A - Accounts and General Ledger Transactions
- B - Customers and Cash Receipts
- C - All Master Record integrations and the Exchange Rate integration
- D - Payroll Transaction integrations

Answer: C

Question: 109

Which of the following is NOT available as a rule in the option tab for the entries section of the General Ledger transaction destination mapping window?

- A - Use Default
- B - Default Non-Imported
- C - Use Source Record set
- D - Empty

Answer: B

Question: 110

Which of the following types of translations can be created?

- A - Universal Translation
- B - Global Translation
- C - Local Translation
- D - Fixed Translation

Answer: B, C

Question: 111

What of the following information can NOT be integrated on Sales Order Processing Order integration with the Great Plains 8.0 standard adapter?

- A - A different ship to address id for each line item.
- B - Lot and serial numbers for line items.
- C - Recurring Order information
- D - Line Item Distribution Accounts

Answer: C

Question: 112

In each source, you can set to order by a column in what order?

- A - Ascending
- B - Descending
- C - Chronological Date
- D - None of the Above

Answer: A, B

Question: 113

On General Ledger Account integration, which of the following is acceptable for the Account Category field?

- A - The name associated with the Account Category, case insensitive, e.g. cash.
- B - The number associated with the Account Category in the GL001 02, e.g. 15.
- C - The name associated with the Account Category, case sensitive, e.g. Cash.
- D - The name or number associated with the Account Category

Answer: C

Question: 114

You have one source file. In order to integrate a journal entry into the General Ledger, what must you specify in the header source so that each row isn't brought over as a separate journal entry?

- A - Order by on the column that is the same value for each row
- B - Group by on the column that is the same value for each row
- C - Check the is Key box on the column that is the same value for each row
- D - Set the datatype of the Journal Entry number as String

Answer: B

Question: 115

IT integration is run and a user does not have rights to the window, will the integration fail?

- A - No, the Great Plains 8.0 adapter integrates at the table level
- B - Yes, the Great Plains 8.0 adapter is macro interface integration, thus a user needs permission at the window level
- C - No, it depends on the database version you are using
- D - No, any user with rights to Integration Manager has rights to the windows

Answer: B

Question: 116

Where can you change the maximum number of errors and warnings?

- A - In the Relationships window
- B - In the Source Properties

- C - In the Object Browser
- D - In the Integration Properties

Answer: D

Question: 117

Which of the following operating systems are not compatible with Integration Manager version 8.0?

- A - Windows 98/98 SE
- B - Windows 95
- C - Windows 2000
- D - Windows XP

Answer: A, B

Question: 118

Each field that has their Field Rule set to use Source Field will display additional settings under the Rule Properties section. The settings include which of the following options?

- A - Translation
- B - Use System Date
- C - If Null
- D - Case Conversion

Answer: A, C, D

Question: 119

Which of the following are sources for the Great Plains 8.0 standard adapter?

- A - XML
- B - Fixed width file
- C - Simple ODBC
- D - Excel 5.0 or higher file

Answer: A, C

Question: 120

How can you preview a Source?

- A - Open the source properties window and go to the Sorting tab
- B - Open the source properties window and go to the Columns tab
- C - Right click on the source name
- D - Go into the Object Browser

Answer: C

Question: 121

Which of the following can be specified for the Log Level of detail?

- A - Database
- B - File
- C - None
- D - Trace

Answer: C, D

Question: 122

When creating a Simple ODBC query to access an Excel spreadsheet, what step must be done in Excel in order to see the data?

- A - Give the spreadsheet a name that matches the query name
- B - Define a named range within the spreadsheet
- C - Format the spreadsheet as a general format
- D - The first Excel row must have column names

Answer: B

Question: 123

If the user wishes to only integrate transactions for a certain date, what would be the best way to limit the data?

- A - Local Translation
- B - Global Translation
- C - Row Restriction
- D - Order By

Answer: C

Question: 124

What is the default Relationship Type?

- A - There can be 0 or 1 record in the child for each record in the master
- B - There must be exactly 1 record in the child for each record in the master
- C - There can be 0 or more records in the child for each record in the master
- D - There must be at least 1 record in the child for each record in the master

Answer: C

Question: 125

If you do NOT mark First Row Contains Column Names in the Source properties, what default names are assigned?

- A - Column1, Column2, Column3, etc.
- B - Name1, Name2, Name3, etc.
- C - F1, F2, F3, etc.
- D - None of the Above

Answer: C

Question: 126

As a Technical Support Engineer, you have been asked to create integration from your sales system into Sales Order Processing in Great Plains. Since you have significant transaction volume each day, you have decided to use the SQL Optimized Adapter to increase performance. What information would you need to set up the SQL Optimized Adapter?

- A - DSN
- B - Password
- C - Database ID
- D - SQL Server Name

Answer: A, B, C

Question: 127

Relationships between text sources must meet which of the following criteria?

- A - Must be between fields of the same data type
- B - Must be between fields with the same maximum number of characters
- C - Must be defined before destination mapping
- D - Relationships are not create between text sources

Answer: A

Question: 128

As a Technical Support Assistant you have been asked to install Integration Manager with all possible adapters. Which of the following adapters are not included in the Integration Manager installation and must be installed separately?

- A - Project Accounting Timesheets
- B - Fixed Assets General Asset Information
- C - Sales Order Processing Sales Transaction
- D - Human Resources Training

Answer: A, B

Question: 129

Where can you delete integration?

- A - Under Tools - Options
- B - Object Browser
- C - Within the open Integration window
- D - Under File -Delete Integration

Answer: B, C

Question: 130

Which of the following is an available Storage Type for the Integration Log?

- A - File
- B - Database
- C - Spreadsheet
- D - XML

Answer: A, B

Question: 131

Which of the following actions is a required step to schedule an integration to run?

- A - Create a Great Plains Login Macro
- B - Create a BAT file to run integration
- C - Create a macro to log out of Great Plains
- D - Create a BAT file to launch Great Plains

Answer: A, B, D

Question: 132

There are multiple ways to add a Source Query to integration. Which of the following is NOT a method to add a Source?

- A - Select File -Add Source
- B - Click the Add Source button
- C - Select Integration from the main menu and choose Add Source
- D - Use the Ctrl+A key combination

Answer: A

Question: 133

What are the three types of sources available with the standard installation?

- A - Text, Simple ODBC, Advanced ODBC
- B - Text, Simple ODBC, XML
- C - Text, Advanced ODBC, XML
- D - Simple ODBC, Advanced ODDC, XML

Answer: A

Question: 134

What is the minimum amount of queries needed for a Payroll Transaction Integration?

- A - None
- B - 1
- C - 2
- D - 3

Answer: C

Question: 135

Before running integration with the Great Plains 8.0 adapter, do you have to be logged into the Great Plains Company you would like to integrate to?

- A - Yes
- B - No, it integrates into the last company that was logged into
- C - No, you specify the company in the integration
- D - No, the integration properties include a company database setting

Answer: A

Question: 136

Which of the following destinations are available with the Great Plains 8.0 standard adapter?

- A - Bank Reconcile
- B - Purchase Order Transaction
- C - Invoicing Transaction
- D - Unit Accounts

Answer: A, D

Question: 137

Integration Manager can add a Batch ID for transaction integration. To do so, in the destination mapping options tab, which option must be set?

- A - Create New Batch - True
- B - Create New Batch - Yes
- C - Add New Batch - True
- D - Missing Batch - Add New Batch

Answer: D

Question: 138

When integrating Customers, what are the available Destination Edit Modes?

- A - Insert Only
- B - Update Only
- C - Insert and Update
- D - Update Existing Records Only

Answer: A, B, C

Question: 139

The following are a list of several vbscripting events. Which selection lists the events in the correct order?

- A - Before Integration, Before Source, After Source, After Integration
- B - Before Source, Before Integration, After Source, After Integration
- C - Before Source, Before Integration, After Integration, After Source
- D - Before Integration, Before Source, After Integration, After Source

Answer: D

Question: 140

Which script event is the last to run when integration is run?

- A - After Document script
- B - After Integration script
- C - After Source script
- D - Field level script

Answer: C

Question: 141

Which of the following is NOT a benefit of using the Direct to Table Adapter?

- A - You can import from a text or ODBC source
- B - Data is full validated
- C - You can import data into applications that don't have defined Integration Manager Destinations.
- D - You can default in Required Fields

Answer: B, D

Question: 142

The XML Source Adapter and the XML Destination Adapter is compatible with which of the following Operating Systems?

- A - Windows 2003
- B - Windows 98
- C - Windows 2000

D - Windows XP

Answer: A, C, D

Question: 143

What are the available document types when integrating Sales Order Processing Transactions with the SQL Optimized Adapter?

A - Orders, Invoices and Returns

B - Orders and Invoices

C - Quotes, Orders and Invoices

D - Backorders and Orders

Answer: B

Question: 144

There are limitations to the Receiving Transaction integration using the SQL Optimized Adapter. Which of the following is NOT a limitation?

A - Multicurrency transactions are not supported.

B - Vendor Summary information is not updated automatically during integration.

C - Sales Document Commitments are not supported

D - Shipment/Invoice document types cannot be entered

Answer: D

Question: 145

How do you change the company to which records are going to be integrated when using the SQL Optimized Adapter?

A - Change only the Company Database on the Destination Settings of the integration.

B - Change only the Company that you are logged into when the integration is running.

C - Change both the Company Database on the Destination Settings and the Company that you are logged into.

D - It is not possible to change the company for an existing integration. A new integration would have to be created.

Answer: A

Question: 146

With Integration Manager, you have the ability to do which of the following using XML?

A - Integrate into a Great Plains destination from an XML source

B - Integrate into an XML destination from a tab delimited source

C - Use XML as both a source and a destination

D - XML is not an option with Integration Manager

Answer: A, B, C

Question: 147

Where should security privileges be setup to add data to the appropriate tables on the SQL Server when using the SQL Optimized Adapter?

- A - On the SQL Server
- B - In Great Plains under Setup > System> Security
- C - In the Integration Properties
- D - None of the Above

Answer: A

Question: 148

In order to improve performance, you would want to use what kind of importing option with the Direct to Table Adapter?

- A - Import directly into an ODBC data source
- B - Import into any ODBC data source that was created within Integration Manager
- C - Import into a custom destination
- D - All of the above

Answer: C

Question: 149

XML is an abbreviation for?

- A - Extensible Markup Language
- B - External Markup Language
- C - External Migration Language
- D - Extensible Media Language

Answer: A

Question: 150

Which of the following should be done when troubleshooting a problematic SQL SERVER connection when using the SQL Optimized Adapter?

- A - Verify the SQL Server is running.
- B - Be sure the DSN with the appropriate name has been setup on the workstation where the integration is being run.
- C - Confirm the login and password is correct for the SQL Server.
- D - Make sure that Great Plains is running.

Answer: A, B, C

Question: 151

How many sources are you required to create when creating Payables transaction integration?

A - 0

B - 1

C - 2

D - 3

Answer: B
