World No 1 Cert Exams

MB3-637

Congratulations!

You have purchased a TestKingonline. Study Guide.

This study guide is a complete collection of questions and answers that have been developed by our professional & certified team.

You must study the contents of this guide properly in order to prepare for the actual certification test. The average time that we would suggest you for studying this study guide is approximately 10 to 20 hours and you will surely pass your exam. We guarantee it!
GOOD LUCK!

Question: 1

Which of the following is true concerning the Safety Stock field in the Item Resource Planning window?

- A. It is combined with the Order Point Quantity field by MRP to produce MRP planned orders
- B. It is combined with the Order Point Quantity, and the Fixed Order Quantity fields to produce MRP planned orders
- C. It is combined with the Fixed Order Quantity field to produce MRP planned orders
- D. The field is informational only and not considered by MRP

Answer: D

Question: 2

The Dynamics - GP Distribution Series BOM and the Manufacturing Series BOM both have a bill of material (BOM) module. Which statement best describes their compatibility?

- A. The Manufacturing bill of material module is a complete separate entity from the Distribution Series bill of material module
- B. Distribution Series does not have a Bill of Material module, so there is no compatibility issue
- C. The Distribution and Manufacturing modules have an interface that allows for linking these two modules
- D. When you install Manufacturing, the system automatically converts Distribution information to the manufacturing bill of material tables

Answer: A

Question: 3

If it takes two employees one hour to complete a routing step, what should the value for labor time and cycle time be for that routing step to accurately reflect proper costing and scheduling?

- A. Labor = 1, Cycle = 1
- B. Labor =1, Cycle = 2
- C. Labor = 2, Cycle = 1
- D. Labor = 2, Cycle = 2

Answer: C

Question: 4

If quick manufacturing orders are being used, what option(s) must be marked in the Routing sequence entry screen? Choose the 2 that apply.

- A. Auto-Back flush Labor
- B. Auto-Back flush Machine
- C. Auto-Back flush Material
- D. Auto-Back flush All

Answer: A, B

Question: 5

What is the term used for routings that are created within routings, and that outline a series of steps that are common to all items?

- A. Pointer routings
- B. Subsequent routings
- C. Active Routings

D. Planning Routings

Answer: A

Question: 6

If a manufacturing process results in needing 10% more of a particular component due to scrap in the process, what window should be used to assign a 10% shrinkage factor?

- A. BOM Header Edit
- B. BOM Entry
- C. Item Engineering
- D. Item Resource Planning

Answer: B

Question: 7

Which of the following routing times are calculated on a per piece basis? Choose the 2 that apply.

- A. Setup Time
- B. Labor Time
- C. Machine Time
- D. Queue Time

Answer: B, C

Question: 8

Which of the following is true concerning the Order Point Quantity field in the Item Resource Planning window?

- A. Order point quantities may only be used with Fixed Order Quantities
- B. Order point quantities are only considered by MRP for sites, not default values
- C. Order point quantities are for buy items only
- D. Order point quantities are informational only

Answer: B

Question: 9

What window is used to make changes to a manufacturing (active) routing without changing the planning routing first?

- A. Manufacturing Order Routing Sequence Edit window
- B. Routing Utilities window
- C. Routing Sequence Entry window
- D. Routing Query window

Answer: A

Question: 10

Which of the following is true concerning the manufacturing system calendar? Choose the 2 that apply.

- A. When new work centers are created any weekend down days indicated on the system calendar default to the calendar of

the newly created work center

- B. When new work centers are created any non-weekend down days indicated on the system calendar default to the calendar of the newly created work center
- C. The manufacturing system calendar has no relation to the inventory calendar used for cycle counts
- D. The manufacturing system calendar is exactly the same as the inventory calendar used for cycle counts

Answer: A, C

Question: 11

Which of the following statements is true regarding the floor stock option found on the BOM Item Detail entry window? Choose the 2 that apply.

- A. If an item is marked as floor stock the cost of this component is included in the cost of the finished good
- B. If an item is marked as floor stock the cost of this component is not included in the cost of the finished good
- C. Only Service type items can be chosen as floor stock
- D. Upon MO receipt, the floor stock expense account will be debited instead of the inventory account of the finished good

Answer: B, D

Question: 12

If 111 units have to be stated in order to end up with 100 units due to scrap, what window should be used to assign a 10% shrink factor?

- A. BOM Header Edit
- B. BOM Entry
- C. Item Engineering
- D. Item Resource Planning

Answer: C

Question: 13

Before a bill of material can be used in manufacturing order entry, what dates will affect the use of this bill of material?

- A. The system does not validate dates for bill of materials
- B. The component in/out dates and MO end date
- C. The BOM effective date and component in/out dates
- D. The allocation dates on the picklist

Answer: C

Question: 14

Item Classes are a useful way to have common settings flow to all items assigned to a class. Which of the following fields are available within an Item Class? Choose the 3 that apply.

- A. Inventory accounts
- B. Standard cost material overheads (amounts and percentages)
- C. Make/Buy code
- D. Allow Back Orders

Answer: A, B, D

Question: 15

What is the purpose of the BOM Security window?

- A. To control who has access to the BOM Entry window
- B. To ensure a bill of material will not be changed
- C. To audit who made the last update to a BOM
- D. To see who has a bill of material record currently in use or locked, and to remove the lock if necessary.

Answer: D

Question: 16

Which of the following is a valid order policy in Manufacturing? Choose the 3 that apply.

- A. Lot for Lot
- B. Period Order Quantity
- C. Manufacture Order Policy
- D. Fixed Order Quantity

Answer: A, B, D

Question: 17

Which of the following is true concerning work center setup?

- A. Capacity of the work center can only be determined by assigning employees to the work center
- B. An outsourced work center must be assigned to a particular vendor
- C. Machines can not be assigned to work centers, but may be considered a work center themselves
- D. Effective dates are required when a work center is entered

Answer: B

Question: 18

If an item can be used as a substitute for one of the components required to manufacture another item, what window is used to make this entry?

- A. BOM Entry
- B. Item Engineering
- C. Item Resource Planning
- D. Item Maintenance Options

Answer: A

Question: 19

Which of the following is a routing status type? Choose the 3 that apply.

- A. Released
- B. Archived
- C. Not Released
- D. Firmed

Answer: A, B, C

Question: 20

Which of the following actions can be performed in the Component Transaction Entry window? Choose the 3 that apply.

- A. Allocate Items
- B. Issue Items
- C. Scrap Items
- D. Reverse issue

Answer: A, B, C

Question: 21

What is the purpose of the Revaluation Security Set field in the Costing Preference Defaults window?

- A. To remove record locks in the Standard Cost Changes window
- B. To remove record locks in the Roll Up and Revalue Inventory window
- C. To limit access to the revaluation process, and make it less likely that inventory will be revalued accidentally
- D. Without this field entered, inventory cannot be revalued

Answer: C

Question: 22

The primary routing for Item A is set up with the Sequence, Setup Time and Labor Time as 100, 1 hour, 0 hours and 200, 0 hours, 2 hours. The labor code for the setup time has a shop rate of \$50 per hour. The labor code for the labor time has a shop rate of \$20 per hour. The standard cost preferences are set up to not prorate. When this item is rolled up and revalued, what is the resulting labor standard cost for Item A?

- A. \$50
- B. \$70
- C. \$90
- D. \$120

Answer: C

Question: 23

What is true regarding maintaining shipping history for an item?

- A. The shipment information can not be edited
- B. The shipment information can be edited
- C. The shipment information generates a BOM number automatically
- D. The shipment information generates a packing slip automatically

Answer: B

Question: 24

Which of the following statements are true concerning data collection? Choose the 2 that apply.

- A. The Automated Data Collection window can be used for either labor or machine entries
- B. The Time Card Entry window can be used for employees or machines
- C. The Data Collection window is the only window to make indirect labor entries
- D. Entries can not be reversed

Answer: A, C

Question: 25

Before using outsourcing, what setup is required? Choose the 3 that apply.

- A. Define an Outsource Work Center
- B. Create a routing sequence
- C. Create a labor or machine code
- D. Mark the outsourced option for an item on Item Resource Planning

Answer: A, B, C

Question: 26

Which of the following options can be chosen in the Manufacturing Order Preference Defaults window? Choose the 3 that apply.

- A. Allocate Inventory when MO Status becomes Released
- B. Allocate upon Reverse Issue
- C. Allocate upon Reverse Scrap
- D. Print Picklist Notes with Picking Report

Answer: A, B, D

Question: 27

Which statement is true regarding Manufacturing Order Processing?

- A. Quantities for components that are issued using the Component Transaction Entry window appear in the In Use bucket for the Issue To site on the Picklist
- B. Quantities for components that are issued using the Component Transaction Entry window appear as allocated
- C. Performing transactions via Manufacturing does not affect any quantities in the Item Quantity Maintenance window
- D. The MO can not be received and closed in the same process

Answer: D

Question: 28

Which of the following statements is true regarding the use of a service item for outsourcing? Choose the 2 that apply.

- A. Service Items can be selected on the Work Center Setup
- B. Entering a Service Item is Required to generate a PO
- C. If no Service item has been defined, the item number appears as "service" on the purchase order
- D. If no service type item is defined, the item number will appear as "SERV+ Last 6 digits of the MoNumber-RoutingSequence"

Answer: A, D

Question: 29

Only finished goods that are used on what type of bill of materials can have option categories assigned to them?

- A. Manufacturing Bill Of Materials
- B. Engineering Bill of Materials
- C. Configured Bill of Materials
- D. Super Bill of Materials

Answer: D

Question: 30

The Machine Variable Overhead cost bucket is chosen to capture outsourcing costs. Assuming a setup of Outsourced Routing sequence, Outsourced Machine Variable Cost, MO Start Quantity, and Previous Routing Sequence WIP Output as Machine time 2.00000, \$10.00/piece, 20 items, and 5. What will be the cost of the purchase order?

- A. \$100.00
- B. \$200.00
- C. \$250.00
- D. \$400.00

Answer: B

Question: 31

Which of the following happens when an MO is received? Choose the 2 that apply.

- A. At least one inventory adjustment is made
- B. WIP accounts are cleared for variance
- C. If a sales order is linked to the MO, an allocation takes place
- D. If a sales invoice is linked to the MO, the invoice is posted

Answer: A, C

Question: 32

Where are the setup preferences found to generate manufacturing orders from sales orders?

- A. Microsoft Dynamics GP menu > Tools > Setup > Sales > Sales Order Processing > Additional > Manufacturing Sales Order Prefs
- B. Microsoft Dynamics GP menu > Tools > Setup > Manufacturing > System Defaults > Manufacturing Orders
- C. Microsoft Dynamics GP menu > Tools > Setup > Manufacturing > System Defaults > MO Schedule Prefs
- D. Microsoft Dynamics GP menu > Tools > Setup > Sales > Sales Order Processing > Additional > MOP/SOP Preferences window

Answer: A

Question: 33

Which of the following is true concerning fulfillment of sales orders? Choose the 2 that apply.

- A. Allocation must take place first
- B. There must be separate fulfillment
- C. An order must be fulfilled before it can be transferred to invoice
- D. An invoice must be fulfilled before it can be posted

Answer: A, D

Question: 34

In the Standard Cost Changes window, which of the following types of standard costs can a user manually change?

- A. Material Costs
- B. Labor Costs
- C. Machine Costs
- D. Labor Fixed Overhead

Answer: A

Question: 35

An item is in an option category and has a valid promotion, why is the promotion not being displayed when the Bill of Material is configured? Choose the 3 that apply.

- A. The item that is assigned to the finished good does not have a price method of Currency or Percent of list
- B. The current date is not with the promotion start and end date
- C. The item is not set up as active in the Item engineering window
- D. Promotions always appear for items in an option category

Answer: A, B, C

Question: 36

Which of the following statements is true regarding Reversing an MO Receipt.

- A. You can change the receipt quantity to a quantity lower than the initial receipt.
- B. You can change a backflushed quantity of a component that was issued
- C. You can select a different serial number to reverse, as long as it was received on the MO, but on a different Receipt Number.
- D. No quantity or serial number changes are permitted

Answer: D

Question: 37

Which statement is correct regarding the Purchases Account for service item for this Outsourced PO?

- A. This account will be the finished good's WIP account for the corresponding WIP bucket chosen to capture outsourcing costs
- B. This account will be the Inventory account from the finished good item card
- C. This account will be the Purchases account from Setup > Posting > Posting
- D. This account will be the Material - Variance account from the finished good

Answer: A

Question: 38

The floor stock expense account can be defined in which of the following windows?

- A. Item Resource Planning
- B. Item Cost Maintenance > Costing
- C. Item Engineering
- D. Manufacturing Order Preference Defaults

Answer: D

Question: 39

Which of the following statements is correct regarding the MO Receipt process? Choose the 3 that apply.

- A. Multiple receipts can be posted for one Manufacturing Order no matter what the valuation method of the finished good
- B. MO Receipts can be saved
- C. Additional components can be backflushed at the time the receipt is posted
- D. Additional components can be consumed at the time the receipt is posted

Answer: A, C, D

Question: 40

Sales promotions are available only for finished goods that have what type of pricing method(s) assigned to them? Choose the 2 that apply.

- A. Currency
- B. % Markup - Current cost
- C. % Margin - Current Cost
- D. % of list price

Answer: A, D

Question: 41

What happens when the Replace Costs button is selected in the Standard Cost Changes window? Choose the 2 that apply.

- A. All proposed standard costs are deleted
- B. All proposed standard costs are moved to current standard costs
- C. All pending standard costs are deleted
- D. All pending standard costs are moved to current standard costs

Answer: A, B

Question: 42

Where does the MO number come from when a manufacturing order is created during sales order entry?

- A. The user can fill in a random MO number, there is no default number
- B. In the Manufacturing Sales Order Prefs window (Microsoft Dynamics GP menu > Tools > Setup > Sales > Sales Order Processing > Additional > Manufacturing Sales Order Prefs), it is the Next MO number field
- C. From the Manufacturing Order Preference default window. (Microsoft Dynamics GP menu > Tools > Setup > Manufacturing > System Defaults > Manufacturing Orders, it is the Next MO number field
- D. In the Manufacturing Order User Preference default window. (Microsoft Dynamics GP menu > Tools > Setup > Manufacturing > User Preferences > Manufacturing Orders, it is the Next MO number field

Answer: C

Question: 43

What happens when an MO is generated from entering a sales order?

- A. The MO is a Quick MO
- B. The quantity being manufactured is "pre-allocated" to the sales order
- C. All components on the picklist are backflushed
- D. All routing steps are backflushed

Answer: B

Question: 44

What happens when an MO is closed?

- A. An allocation takes place
- B. An invoice is posted

- C. WIP accounts are cleared
- D. Links to sales orders are lost

Answer: C

Question: 45

What are valid Manufacturing Order Statuses for Reverse an MO Receipt [Transactions > Manufacturing > Manufacturing Orders > MO Receipt Entry]? Choose the 2 that apply.

- A. Released
- B. Partially Received
- C. Complete
- D. Closed

Answer: B, C

Question: 46

What is the purpose of the Manual Scheduling window?

- A. Reschedule manufacturing order routing sequences for single a manufacturing order
- B. Reschedule all the routing sequences in one or more manufacturing orders
- C. Create manufacturing order scheduling preferences
- D. Show all manufacturing orders scheduled for the selected work center for a specific time period

Answer: A

Question: 47

Which of the following statements is true regarding Outsourcing?

- A. Removing a service item from an outsourced work center could change the suggested price on the purchase order
- B. Purchase Orders can be created when the MO status is Hold
- C. The first routing sequence can never be established as an outsourced sequence
- D. Purchase Orders can be created when the MO status is Quote/Estimate

Answer: A

Question: 48

When configuring an item, what happens when an item option is selected that is excluded by an earlier option selection?

- A. An alert message displays, telling you that the item selections are incompatible and the user can continue adding other options
- B. An alert message displays, telling you that the item selections are incompatible and the user cannot continue adding other options
- C. An alert message displays and the user can continue adding other options
- D. An alert message displays and the user cannot continue adding other options

Answer: A

Question: 49

A repair order does not require all of the parts it takes to build an order from scratch. After the MO is entered what is the easiest way to manage component requirements?

- A. The BOM should be temporarily modified to reflect the appropriate items required for the repair
- B. The picklist should be altered to reflect the appropriate items required for the repair
- C. The BOM and the picklist should be modified
- D. All components should be set to backflush

Answer: B

Question: 50

Which of the following statements is true regarding the MO Close process?

- A. MO Status can only be Complete or Partially Received to close
- B. The Posting Date will default to the first day of the current month
- C. Additional Labor can be applied to the MO after it is closed
- D. Variances are calculated at this time

Answer: D

Question: 51

Which of the following is performed in the Picklist window?

- A. Allocate all
- B. Unissue all
- C. Floor stock all
- D. Backflush all

Answer: D

Question: 52

The Machine Variable Overhead cost bucket is chosen to capture outsourcing costs. Assuming a setup of Outsourced Routing sequence, Outsourced Machine Variable Cost, MO Start Quantity, and Previous Routing Sequence WIP Output as Machine time 2.00000, \$10.00/piece, 20 items, and 5, what will be the amount of the shipment document created?

- A. 100
- B. 200
- C. 300
- D. 400

Answer: A

Question: 53

Which statement is true regarding picking and issuing materials in the Component Transaction Entry window?

- A. There is no affect on the items in the system
- B. You can not save an allocation pick document, you must post it
- C. Inventory will be decreased from the Issue from Site upon save
- D. The transaction must be posted in order to decrease inventory

Answer: D

Question: 54

In MO Schedule Preferences, you are set up to Apply Shrinkage to End Item Starting Quantity. Additionally end item X has shrinkage of 50% as setup in Item Resource Planning. If you enter a regular manufacturing order for a quantity of 10 units of item X, what will be your start quantity on a manufacturing order?

- A. 10
- B. 15
- C. 20
- D. 25

Answer: C

Question: 55

Which of the following cost buckets can be chosen to reflect the outsourcing costs for a Manufacturing Order? Choose the 3 that apply.

- A. Material
- B. Labor
- C. Machine Fixed Overhead
- D. Machine Variable Overhead

Answer: B, C, D

Question: 56

Which of the following is a setup option for outsourcing? Choose the 3 that apply.

- A. Apply Additional Outsourcing Costs to MO
- B. Mark Outsourced Sequences as "Done" when Service is Received
- C. Include Sequence Notes Report with Outsourcing Shipping Report
- D. Include Sequence Notes Report when Order is transferred to an Invoice

Answer: A, B, C

Question: 57

Outsourcing setup options can be found in which of the following windows? Choose the 3 that apply.

- A. Manufacturing Order Preference Defaults
- B. WIP Preference Defaults
- C. Routing Preference Defaults
- D. Bill of Material Preference Defaults

Answer: A, B, C

Question: 58

Which of the following would cause the required date for one of the components on a picklist to differ from that of other components? Choose the 3 that apply.

- A. There is an offset value for the component on the BOM
- B. The date has been manually changed

- C. There is a BOM/Routing link
- D. There are different lead times for the components

Answer: A, B, C

Question: 59

Which of the following is true with respect to the link between manufacturing orders and sales orders?

- A. There can be many manufacturing orders linked to one sales order line item
- B. There can be many sales order line items linked to one manufacturing order
- C. Sales orders must be linked to manufacturing orders
- D. Linking sales orders to manufacturing orders is not allowed

Answer: B

Question: 60

Which of the following statements is true regarding the Required Date field located on the picklist? Choose the 3 that apply.

- A. If there is NO BOM/Routing link and no lead time offset the MO start date will populate
- B. This date will always be the MO start date
- C. Date is calculated based up on lead time offset for the component
- D. Date is calculated based upon the BOM/Routing Link

Answer: A, C, D

Question: 61

The primary routing for Item A is set up with the Sequence, Setup Time and Labor Time as 100, 1 hour, 0 hours and 200, 0 hours, .5 hours. The labor code for the setup time has a shop rate of \$20 per hour. The labor code for the labor time has a shop rate of \$10 per hour. The standard cost preferences are set up to prorate the setup cost, based on the item's standard quantity, which is 100. When this item is rolled up and revalued, what is the resulting labor standard cost for Item A?

- A. \$5.20
- B. \$10.00
- C. \$20.20
- D. \$30.00

Answer: A

Question: 62

The Machine Variable Overhead cost bucket is chosen to capture outsourcing costs. Assuming a setup of Outsourced Routing sequence, Outsourced Machine Variable Cost, MO Start Quantity, and Previous Routing Sequence WIP Output as Machine time 2.00000, \$10.00/piece, 20 items, and 5. What will be the quantity to order on the purchase order?

- A. 10
- B. 20
- C. 30
- D. 40

Answer: D

Question: 63

What is true regarding MO receipts when sales order line items are linked?

- A. The MO receipt advances the sales order status to fulfilled
- B. The MO receipt advances the sales order status to invoiced
- C. When a partial receipt is done the sales line items which should be allocated need to be indicated
- D. When a partial receipt is done it is not possible to direct to which line items the allocation should take place

Answer: D

Question: 64

In the Manufacturing Sales Order Prefs window (Microsoft Dynamics GP menu > Tools > Setup > Sales > Sales Order Processing > Additional > Manufacturing Sales Order Prefs] what are the MFG Order Status choices for an MO created by entering a Sales Order?

- A. Open or Released
- B. Quote/Estimate or Open
- C. Firmed or Hold
- D. Hold or Complete

Answer: A

Question: 65

Which statement is true regarding scheduling MRP? Choose the 2 that apply.

- A. It only can be accomplished using a macro and Windows scheduler
- B. You can only schedule a full regeneration Type
- C. You can schedule both a net change or a cull regeneration
- D. A scheduled MRP run is a scheduled SQL job. The SQL Server Agent must be running for the scheduled MRP to run.

Answer: C, D

Question: 66

What is the purpose of the Batch Reschedule window?

- A. To reschedule manufacturing order routing sequences for a single manufacturing order
- B. To reschedule all the routing sequences for one or more manufacturing orders
- C. To create manufacturing order scheduling preferences
- D. To show all manufacturing orders scheduled for the selected work center for a specific time period

Answer: B

Question: 67

When entering a manufacturing order an End Quantity is specified. When tabbing off the End Quantity field the Start Quantity defaults to a number more than the End Quantity. For this to happen, what must be true?

- A. The Manufacturing Order Preference Defaults are set to account for shrinkage
- B. The Manufacturing Order Preference Defaults are not set to account for shrinkage
- C. The item being manufactured must have a shrinkage factor on one of its BOM components
- D. The item being manufactured must have a shrinkage factor in its Item Resource Planning record

Answer: D

Question: 68

Which statements are true with respect to pending and proposed costs? Choose the 2 that apply.

- A. Pending costs are established using the Standard Cost Changes window
- B. Pending costs are established using the Roll Up and Revalue Inventory window
- C. Proposed costs are established using the Standard Cost Changes window
- D. Proposed costs are established using the Roll Up and Revalue Inventory window

Answer: B, C

Question: 69

Which of the following MO tasks can be done to more than one order at a time? Choose the 3 that apply.

- A. MO Release
- B. Shortage Inquiry
- C. MO Receipt
- D. MO Close

Answer: A, B, D

Question: 70

A sales forecast has been created for Item 1 (a finished good item) with Forecast period = 1 month, Forecast start date = July 1, and Forecast quantity as July 1 = 30 and August 1 = 40. The sales forecast has been set up to be seen by material requirements planning (MRP), with a demand fence of 2 periods. The MRP run date is June 20. There are no orders for Item 1, and the on-hand amount is zero (it is out of stock). What is the result of the MRP run?

- A. Nothing, the sales forecast is outside the demand time fence
- B. An MRP planned order (MMO) is created for 30 with a due date of July 1
- C. An MRP planned order (MMO) is created for 40 with a due date of August 1
- D. An MRP planned order (MMO) is created for 70 with a due date of September 1

Answer: C

Question: 71

Account numbers for standard cost items can be defined in which window? Choose the 2 that apply.

- A. Item Account Maintenance window
- B. Item Account Maintenance > Costing window
- C. Standard Item Material Cost window
- D. Roll Up and Revalue Inventory window

Answer: A, B

Question: 72

Where does the minimum order quantity in MRP calculations come from if an item has a default vendor at the site?

- A. The Item Vendor Maintenance window

- B. The item\site value from the Item Resource Planning window
- C. The item\site value from the items default site from the Item Resource Planning window
- D. The item default value from the Item Resource Planning window

Answer: A

Question: 73

If a purchase order or manufacturing order is in a released status, where will it show up in the MRP workbench?

- A. Gross Requirements
- B. Scheduled Receipts
- C. Planned Order Receipts
- D. Planned Order Releases

Answer: B

Question: 74

How can you view a snapshot of the MRP preference values at the time of regeneration, including historic MRP run data?

- A. You cannot view the preferences, only the time and date of the regeneration
- B. Go the MRP Detail window [Inquiry > Manufacturing > MRP > Detail]
- C. You must create a Smartlist of a custom report to view this information
- D. Go to Transactions > Manufacturing > MRP > Regeneration > History of Runs

Answer: D

Question: 75

Which of the following conditions must be met to generate a manufacturing order from the Master Production Scheduling (MPS) window? Choose the 3 that apply.

- A. The forecast period must be within one period of the system date
- B. A routing must be set up for the item
- C. The item must be a make or either item (as defined in item engineering)
- D. A scheduling preference must be assigned to the item in the MPS window

Answer: B, C, D

Question: 76

Users can have the Purchase Request Resolution window do which of the following?

- A. Automatically use the shortest lead time
- B. Automatically use primary vendor
- C. Link suggested purchase orders to sales orders
- D. Link suggested purchase orders to manufacturing order requirements

Answer: B

Question: 77

Which statement is correct regarding capacity adjustments made to work centers?

- A. Changes become effective immediately to the work center; there is no option to delay the changes
- B. Changes become effective based on the Display Date in the Work Center Setup Window
- C. Changes become effective only when the Effective Capacity has changed
- D. Changes become effective after MRP is run to completion

Answer: B

Question: 78

Where can you add unplanned demand which will not create a supply order at MRP Regeneration, but only for a projected Available Balance simulation?

- A. Sales Forecasting
- B. MRP PAB Add Order
- C. Sales Transaction Entry
- D. You cannot add simulated demand in Dynamics - GP

Answer: B

Question: 79

Items and/or Sites can be excluded in MRP by selecting settings in which of the following windows? Choose the 3 that apply.

- A. Item Resources Planning
- B. Item Vendor Maintenance
- C. Site Maintenance
