**No Pass No Pay!**

**MCSE, CCNA, CCNP, OCP, CIW, JAVA, Sun Solaris, Checkpoint  
World No 1 Cert Guides**

**SL 6.5 Installations & Configuration  
MB4-349**

## **Congratulations!**

You have purchased a TestKingonline. Study Guide.

This study guide is a complete collection of questions and answers that have been developed by our professional & certified team. You must study the contents of this guide properly in order to prepare for the actual certification test. The average time that we would suggest you for studying this study guide is approximately 10 to 20 hours and you will surely pass your exam. We guarantee it!

GOOD LUCK!

## **Total No of Questions:-150**

### **Question: 1**

What Microsoft Dynamics SL module must be installed and set up to allow the scheduling and off loading of processes to a designated machine?

- A - General Ledger
- B - Accounts Payable
- C - Accounts Receivable
- D - Application Server

**Answer: D**

### **Question: 2**

What is the primary reason for installing additional servers in the Microsoft Dynamics SL hardware environment?

- A - To off load printing, email and file services from the main database server
- B - To make more hard disk storage space available
- C - To allow for duplicate data entry
- D - To provide a redundant environment that would prevent a total system failure in the event of a server crash

**Answer: A**

### **Question: 3**

What is the purpose of Microsoft Dynamics SL's two-database design? Choose the 2 that apply.

- A - Provide data redundancy that protects the financial data in the event of a system crash.
- B - Maintain system data separately from financial data for storage and operating efficiency.
- C - Allows Microsoft Dynamics SL to distribute data evenly across databases.
- D - Permit multiple Application databases to coexist on the same computer system.

**Answer: B, D**

### **Question: 4**

Which of the following is SQL Server back up types? Choose the 3 that apply.

- A - Full database backup
- B - Transaction log backup
- C - Differential back up
- D - Nightly Backup

**Answer: A, B, C**

**Question: 5**

What is the purpose of referential Integrity?

- A - Enforces the relationship between a Microsoft Dynamics SL system database and its application databases.
- B - Enforces the relationship between database tables.
- C - Enforces the relationship between the Microsoft Dynamics SL System Manager module and all other Microsoft Dynamics SL modules.
- D - Enforces the relationship among all windows (data entry, maintenance, processing, reporting) making up a Microsoft Dynamics SL module.

**Answer: B**

**Question: 6**

You wish to deploy Microsoft Dynamics SL in an environment with 34 concurrent users. Which edition needs to be installed?

- A - Single-User Microsoft Dynamics SL Standard Edition
- B - Multi-User Microsoft Dynamics SL Standard Edition
- C - Microsoft Dynamics SL Enterprise Edition
- D - Microsoft Dynamics SL Professional

**Answer: D**

**Question: 7**

Which Microsoft versions of Windows are supported for a Microsoft Dynamics SL client installation? Choose the 2 that apply.

- A - Windows 95
- B - Windows 2003
- C - Windows XP Professional
- D - Windows 2000 Professional

**Answer: C, D**

**Question: 8**

Which of the following statements about referential integrity is true?

- A - Referential integrity is programmed into Microsoft Dynamics SL application windows.
- B - Referential integrity is solely the responsibility of the Microsoft Dynamics SL System Manager module.
- C - Microsoft Dynamics SL's referential integrity functions are closely connected to the referential integrity functions provided by Microsoft SQL Server.
- D - You can optionally activate Microsoft SQL Server's referential integrity capabilities to extend the referential integrity capabilities of Microsoft Dynamics SL.

**Answer: A**

**Question: 9**

When consulting with a customer in regard to needed hard disk space for Microsoft Dynamics SL databases, which of the following responses would you choose?

- A - A typical system and application database together will not require more than 100 MBs
- B - A typical system and application database together will require a minimum of 1GB required
- C - A typical system and application database together need anywhere from 30 GBs to several hundred GBs
- D - A typical system and application database together need anywhere from 300 MBs to several GBs

**Answer: D**

**Question: 10**

What remote connectivity solutions does Microsoft Dynamics SL support running on?

- A - The client installed on a workstation that is connected to the server by a Ti line. (WAN)
- B - Windows Terminal Server
- C - PC Any where
- D - A dial up connection

**Answer: B**

**Question: 11**

When analyzing a company for Standard Edition vs. Professional Edition for Microsoft Dynamics SL, what profiles would be most suitable for Standard Edition? Choose the 2 that apply.

- A - Use Flex key capability to segment the Inventory ID
- B - 15 users using Solomon six to eight hours/day
- C - 10 or less users
- D - Need Multi-company processing

**Answer: A, C**

**Question: 12**

Which of the following statements about the Microsoft Dynamics SL System database is false?

- A - The System database contains Microsoft Dynamics SL product registrations, security settings and database field attributes.
- B - The System database does contain some accounting data.
- C - A separate System database must be created for each Application database you define.
- D - The System database eliminates the need for redundant system-level information in Application databases.

**Answer: C**

**Question: 13**

Which of the following could cause problems with a Microsoft Dynamics SL installation? Choose the 3 that apply

- A - Conflicting .dlls
- B - Inadequate RAM
- C - Using a USB keyboard and mouse
- D - Out of date Windows and SQL Server service packs

**Answer: A, B, D**

**Question: 14**

What program do you use to set up SQL back up jobs?

- A - SQL Profiler
- B - Microsoft Dynamics SL Database Maintenance
- C - Enterprise Manager
- D - Service Manager

**Answer: C**

**Question: 15**

Good implementation policies recommend a “pre-installation” process. Which of the following should be included in a pre-installation process? Choose the 3 that apply.

- A - You can optionally activate Microsoft SQL Server’s referential integrity capabilities to extend the referential integrity capabilities of Solomon.
- B - Protect the data of any current accounting software that Microsoft Dynamics SL is replacing.
- C - Verify adequate hardware and software resources to run Microsoft Dynamics SL...
- D - Obtain the tools and resources used before, during and alter the installation of Microsoft Dynamics SL program files.

**Answer: B, C, D**

**Question: 16**

When installing Microsoft Dynamics SL to a workstation that is running Windows XP, what account should you be logged into the computer with?

- A - Administrator
- B - Power User
- C - It does not matter for Windows XP
- D - User

**Answer: A**

**Question: 17**

What backup scheme would be the most efficient for a company that has a high transaction volume that is concerned with the amount of data that could be lost?

- A - A full backup nightly.
- B - A full backup weekly and transaction log backups throughout the day.
- C - A full backup weekly, a differential backup nightly and transaction log backups throughout the day.
- D - A full backup weekly and transaction log backups nightly.

**Answer: C**

**Question: 18**

Which of the following would be considered an “Initialization” process as opposed to “normal operation

- A - Enter vouchers & adjustments
- B - Load the database with beginning balances and historical data
- C - Make a backup of the database
- D - Run Physical Database integrity

**Answer: B**

**Question: 19**

Which is the correct order of Microsoft Dynamics SL user access rights from most to least restrictive?

- A - View, insert, update, delete, initialization
- B - View, update, insert, initialization, delete
- C - View, update, insert, delete, initialization
- D - View, update, delete, insert, initialization

**Answer: C**

**Question: 20**

How do you access the Database Maintenance program to create a new Application database?

- A - From the Utility menu within Microsoft Dynamics SL
- B - It is run from the Utility menu list
- C - It is run from the icon in the Microsoft Dynamics SL program folder
- D - It is an option in the Microsoft SQL Server Enterprise Manager program after the initial installation of Solomon

**Answer: C**

**Question: 21**

Which of the following are true statements about Microsoft Dynamics SL product registration?  
Choose the S that apply.

- A - Microsoft Dynamics SL must be registered immediately after you install the programs and set up your first System-Application database.
- B - If the company name on the registration screen is changed, the current unlocking keys will no longer be valid.
- C - Registering Microsoft Dynamics SL does not erase or alter any of the financial data stored in a database prior to registration.
- D - If Microsoft Dynamics SL is not registered within 20 database accesses, the application automatically makes the database inaccessible.

**Answer: B, C, D**

**Question: 22**

Which of the following is the recommended way to install Microsoft Dynamics SL supporting products?

- A - Double-click their setup program icon from the appropriate directory on the Microsoft Dynamics SL CD.
- B - Simply follow the prompts; Microsoft Dynamics SL Setup automatically starts each supporting product's setup program as soon as installation of Microsoft Dynamics SL is complete.
- C - Select each products installation option from the opening Microsoft From the Microsoft Dynamics SL Installation window that displays when you insert the Microsoft Dynamics SL CD.
- D - Choose Start - Run, type in or browse to the appropriate path and file name, and click OK.

**Answer: C**

**Question: 23**

Which option should you select when installing Crystal Reports for use with Microsoft Dynamics SL?

- A - Local Install (Typical)
- B - Partial Local Install (Custom)
- C - NetworkInstall
- D - Partial Network Install

**Answer: A**

**Question: 24**

What two Microsoft Dynamics SL registration keys are required?

- A - General Ledger and Accounts Payable
- B - General Ledger and System Manager

- C - System Manager, General Ledger, Accounts Payable and Accounts Receivable
- D - System Manager and FRx

**Answer: B**

**Question: 25**

Which of the following is NOT included in Microsoft Dynamics SL security?

- A - Grant access to a specific field in a window
- B - Grant access to view screens
- C - Grant access to initialize data
- D - Grant access to view reports

**Answer: A**

**Question: 26**

Which of the following is listed in the correct order from lowest to highest of system security levels?

- A - Solomon security, Network security, Microsoft SQL Server security
- B - Network security, Solomon security, Microsoft SQL Server security
- C - Network Security, Microsoft SQL Server security, Solomon security
- D - There is no "order"; all security functions are at the same level

**Answer: C**

**Question: 27**

When you start the Microsoft Dynamics SL Setup program, which action does Setup perform automatically?

- A - Shut down any other currently running Windows applications
- B - Determine whether or not the server needs a newer version of OLE
- C - Detect whether or not Microsoft SQL Server is installed and prompt you to install it if it is not
- D - Open the Welcome window on first-time installations; open the Select Solomon

**Answer: B**

**Question: 28**

What back up scheme would be best for a company that has a lower transaction volume that is concerned with a fast recovery?

- A - A full backup weekly and transaction log backups throughout the day.
- B - A full backup weekly, a differential backup nightly and transaction log backups throughout the day.
- C - A full backup weekly.

D - A full backup each night.

**Answer: D**

**Question: 29**

Where does Microsoft Dynamics SL store a record of the last database that a workstation has logged into?

- A - Windows Registry
- B - PVRec.csv
- C - Sollnst.ctg
- D - Solomon.ini

**Answer: D**

**Question: 30**

Steve has Insert rights to the Journal Transaction screen in Microsoft Dynamics SL. The Managers group has Update rights to the Journal Transaction screen in Microsoft Dynamics SL. Steve is a member of the Managers group. Which of the following is true?

- A - Steve will have Insert rights because individual user rights override group rights.
- B - Steve will have Update rights because group rights override individual rights.
- C - Steve will have no rights, because the rights conflict.
- D - Steve is not allowed to be in a group because he has individually assigned rights.

**Answer: A**

**Question: 31**

Which of the following options can you change within Microsoft Dynamics SL? Choose the 2 that apply.

- A - Control the display of grid row numbers
- B - Define a network drive
- C - Define shortcut keys
- D - Control the display of grid lines

**Answer: A, D**

**Question: 32**

Which of the following is NOT a Microsoft Dynamics SL Edit menu function? Choose the 2 that apply.

- A - Cut
- B - Copy
- C - Select All
- D - Initialize

**Answer: C, D**

**Question: 33**

Which Microsoft Dynamics SL toolbar button(s) would you click to save the current record and prepare for entry of a new record? Choose the 2 that apply.

- A - Save +New
- B - Close + New
- C - Close
- D - Finish

**Answer: A, D**

**Question: 34**

What is the purpose of the Microsoft Dynamics SL Navigation Level function?

- A - Control how the cursor moves through a Microsoft Dynamics SL window when you are pressing the TAB key.
- B - Rearrange the order Microsoft Dynamics SL modules are listed on the Module menu according to user-specified settings.
- C - Establish user-defined settings that automatically open certain Microsoft Dynamics SL windows when the user logs into Solomon.
- D - Control how Microsoft Dynamics SL navigates through batch or document records.

**Answer: D**

**Question: 35**

What is a Microsoft Dynamics SL template?

- A - A general Microsoft Dynamics SL window customization that serves as the basis for userspecific customizations of the same window.
- B - An Application database that contains core data (accounts, sub accounts, etc.) used by all Application databases from which you can quickly create other Application databases.
- C - A set of commonly used window data saved and entered as a block to help reduce a repetitive keying in the window.
- D - The default settings from Microsoft Dynamics SL application setup windows that appear in data entry and maintenance windows.

**Answer: C**

**Question: 36**

Which of the multi-item selection techniques are supported when a Microsoft Dynamics SL window is in grid view?

- A - Left mouse click and drag
- B - Right mouse click and drag
- C - CTRL and arrow keys

D - Right mouse click and enter row numbers to copy

**Answer: A**

**Question: 37**

How do you change the password for the Master user?

A - Use Microsoft Enterprise Manager to change the password for the Master Login.

B - Log into Microsoft Dynamics SL as Sysadmin and then open the Change Password screen on the Utility menu.

C - Open the Database Administration screen and change the password on the line with a blank Database Name field.

D - Master's password can not be changed after it is set during the initial creation of the database.

**Answer: C**

**Question: 38**

What is the extent of Microsoft Dynamics SL's module-level logical integrity checking capabilities? Choose the 2 that apply.

A - Compare

B - Validate

C - Rebuild Indexes

D - Delete Indexes

**Answer: A, B**

**Question: 39**

What is the purpose of the Microsoft Dynamics SL Note function?

A - To print reports.

B - Provide away to add custom, display-only fixed text to Microsoft Dynamics SL windows.

C - Attach unique or confidential information to Microsoft Dynamics SL data items.

D - Provide a way of visually indicating that certain window fields are required fields.

**Answer: C**

**Question: 40**

How can you access the inquiry window on a field that supports this feature? Choose the 2 that apply.

A - Press the F3 key.

B - Click the Inquiry button next to the field.

C - Press the F4 key.

D - Double right click in the field.

**Answer: A, D**

**Question: 41**

Which of the following are standard Microsoft Dynamics SL selections on the printer options screen? Choose the 3 that apply.

- A - Print to File
- B - Convert to a Microsoft Word Document
- C - Save As Default
- D - Use Windows Default Printer

**Answer: A, C, D**

**Question: 42**

Which of the following statements are true with regard to backing-up Microsoft Dynamics SL program and data files? Choose the 3 that apply.

- A - The System and the Application databases should be backed-up on a daily basis..
- B - The Solomon\Usr\_Rpts directory should be backed-up whenever a report is customized.
- C - Program files can be backed-up but it is not absolutely necessary as they may also be reinstalled from the CD-ROM.
- D - It is only necessary to backup application databases.

**Answer: A, B, C**

**Question: 43**

How do you switch between grid view and form view in Microsoft Dynamics SL windows? Choose the 2 that apply.

- A - Toggle the grid functions on and off in the Options menu.
- B - Double-click the left mouse button when the cursor is over one of the window's detail area headings.
- C - Press ALT + G and ALT + F as necessary.
- D - Place the cursor in a detail area field and press F4.

**Answer: B, D**

**Question: 44**

What is initializing mode typically used for? Choose the 2 that apply.

- A - Setting up the database's chart of accounts, sub account, and budgeting structure
- B - Importing the information contained in .csv files: messages, possible values, report controls, window settings
- C - Entering beginning account balances and historical data
- D - Allows an installation to pick a starting point for entering existing accounting information into Microsoft Dynamics SL

**Answer: C, D**

**Question: 45**

Microsoft Dynamics SL's extended report options include which of the following? Choose the 2 that apply.

- A - Options for sorting and selecting
- B - Microsoft Dynamics SL short-cut keys
- C - Total and page break settings
- D - Options for deleting records

**Answer: A, C**

**Question: 46**

If a module's logical integrity check reports an integrity error, what options do you have to correct it?

- A - Manually change the data table
- B - Rewrite the record to match the contents of the data file
- C - Add another record
- D - Re-execute the module's integrity check, this time running the correct or re-build option

**Answer: D**

**Question: 47**

How do you re-route a Microsoft Dynamics SL report to a file?

- A - Use the report window's Print Preview functions, click the Print button, and define the output file name.
- B - Use the report window's Template tab to set up a report template with the report file name as the output device option.
- C - Click the print options button and use the Print Options (98.20.00) window to choose Print to File.
- D - Select the Print to File option on the Company Selection tab.

**Answer: C**

**Question: 48**

Which of the following is NOT maintained in the Microsoft Dynamics SL event log?

- A - Process and user IDs
- B - Corrective actions for events with errors
- C - Process execution date
- D - Log view date

**Answer: B**

**Question: 49**

If you are working in one Application database and want to begin working in another Application database how do you login to the new company? Choose the 3 that apply.

- A - Exit Microsoft Dynamics SL after saving all changes; then start a new session choosing the new company.
- B - Use Microsoft Dynamics SL's Close Company function to close the current database; then, use the Open Company command to open the new database.
- C - Simply use Microsoft Dynamics SL's Open Company function; Microsoft Dynamics SL supports multiple Application databases open at the same time.
- D - Use the Switch Company icon to exit and login to a new company.

**Answer: A, B, D**

**Question: 50**

Which of the following is true of Microsoft Dynamics SL's multi-item copy and paste functions? Choose the 2 that apply.

- A - The multi-item selection can only be copied from an existing record to a new record in the same Microsoft Dynamics SL window.
- B - Multi-items selected and copied in a random pattern must be pasted into their destination using the same random pattern.
- C - If the copying order of a multi-item selection is sequential, the pasting order does not have to be specified as long as the destination is using the same sequential order.
- D - Multi-item selections do not include system calculated items.

**Answer: C, D**

**Question: 51**

What is the purpose of Microsoft Dynamics SL's two-database design? Choose the 2 that apply.

- A - Provide data redundancy that protects the financial data in the event of a system crash.
- B - Maintain system data separately from financial data for storage and operating efficiency.
- C - Allows Microsoft Dynamics SL to distribute data evenly across databases.
- D - Permit multiple Application databases to coexist on the same computer system.

**Answer: B, D**

**Question: 52**

What is the purpose of referential Integrity?

- A - Enforces the relationship between a Microsoft Dynamics SL system database and its application databases.
- B - Enforces the relationship between database tables.

C - Enforces the relationship between the Microsoft Dynamics SL System Manager module and all other Microsoft Dynamics SL modules.

D - Enforces the relationship among all windows (data entry, maintenance, processing, reporting) making up a Microsoft Dynamics SL module.

**Answer: B**

**Question: 53**

Which of the following statements are true or the Microsoft Dynamics SL Implementation plan? Choose the 2 that apply.

A - The larger the Microsoft Dynamics SL installation, the lesser the importance of a well-defined implementation plan.

B - A good implementation plan clearly defines for everyone involved exactly what is to happen once the Microsoft Dynamics SL installation begins.

C - All implementation plans are a like; your original plan will work for every Microsoft Dynamics SL installation thereafter.

D - The Microsoft Dynamics SL Implementation plan clearly identifies and documents customer goals and objectives.

**Answer: B, D**

**Question: 54**

The Microsoft Dynamics SL Tools for Visual Basic module includes which of the following? Choose the 2 that apply.

A - Visual Basic

B - Schema Creation Utilities

C - Screen Painter

D - Seagate Crystal Reports

**Answer: B, C**

**Question: 55**

What are good ways to optimize Microsoft Dynamics SL performance in the Windows environment on the server? Choose the 3 that apply.

A - Decrease conventional memory as much as possible

B - In the Systems Properties, set the Performance Options to optimize performance for Background Services

C - Allocate more memory to SQL server

D - In the Systems Properties, set the Performance Options to optimize performance for Application

**Answer: B, C, D**

**Question: 56**

What is the primary reason for installing additional servers in the Microsoft Dynamics SL hardware environment?

- A - To off load printing, email and file services from the main database server
- B - To make more hard disk storage space available
- C - To allow for duplicate data entry
- D - To provide a redundant environment that would prevent a total system failure in the event of a server crash

**Answer: A**

**Question: 57**

Which of the following cannot be installed from the Microsoft Dynamics SL CD(s)?

- A - Seagate Crystal Reports
- B - Microsoft Dynamics SL Tools for Visual Basic
- C - Microsoft SQL Server
- D - Microsoft Dynamics SL Kernel (SWIM)

**Answer: C**

**Question: 58**

What Microsoft Dynamics SL module must be installed and set up to allow the scheduling and off loading of processes to a designated machine?

- A - General Ledger
- B - Accounts Payable
- C - Accounts Receivable
- D - Application Server

**Answer: D**

**Question: 59**

When consulting with a customer in regard to needed hard disk space for Microsoft Dynamics SL databases, which of the following responses would you choose?

- A - A typical system and application database together will not require more than 100 MB5
- B - A typical system and application database together will require a minimum of 1 GB required
- C - A typical system and application database together need anywhere from 30 GBs to several hundred GBs
- D - A typical system and application database together need anywhere from 300 MBs to several GBs

**Answer: D**

**Question: 60**

Which of the following are SQL Server back up types? Choose the 3 that apply.

- A - Full database backup
- B - Transaction log backup
- C - Differential back up
- D - Nightly Backup

**Answer: A, B, C**

**Question: 61**

Which of the following are key elements of the computer system inventory you should conduct before installing Microsoft Dynamics SL? Choose the 3 that apply.

- A - Document network interlace card (NIC) data
- B - Verify available RAM meets recommendations
- C - Verify available hard drive space
- D - Verify you have a 32 bit sound card

**Answer: A, B, C**

**Question: 62**

What program do you use to set up SQL back up jobs?

- A - SQL Profiler
- B - Microsoft Dynamics SL Database Maintenance
- C - Enterprise Manager
- D - Service Manager

**Answer: C**

**Question: 63**

Which of the following statements about the Microsoft Dynamics SL System database is false?

- A - The System database contains Microsoft Dynamics SL product registrations, security settings and database field attributes.
- B - The System database does contain some accounting data.
- C - A separate System database must be created for each Application database you define.
- D - The System database eliminates the need for redundant system-level information in Application databases.

**Answer: C**

**Question: 64**

What remote connectivity solutions does Microsoft Dynamics SL support running on?

- A - The client installed on a workstation that is connected to the server by a T1 line. (WAN)
- B - Windows Terminal Server
- C - PC Anywhere
- D - A dial up connection

**Answer: B**

**Question: 65**

When analyzing a company for Standard Edition vs. Professional Edition for Microsoft Dynamics SL, what profiles would be most suitable for Standard Edition? Choose the 2 that apply.

- A - Use Flex key capability to segment the Inventory ID
- B - 15 users using Solomon six to eight hours/day
- C - 10 or less users
- D - Need Multi-company processing

**Answer: A, C**

**Question: 66**

Which of the following should not cause problems with a Microsoft Dynamics SL installation?

- A - Conflicting .dlls
- B - Inadequate RAM
- C - Using a USB keyboard and mouse
- D - Out of date Windows and SQL Server service packs

**Answer: C**

**Question: 67**

When you start the Microsoft Dynamics SL Setup program, which action does Setup perform automatically?

- A - Shut down any other currently running Windows applications
- B - Determine whether or not the server needs a newer version of OLE
- C - Detect whether or not Microsoft SQL Server is installed and prompt you to install it if it is not
- D - Open the Welcome window on first-time installations; open the Select Solomon

**Answer: B**

**Question: 68**

Which of the following statements about Microsoft Dynamics SL databases is true?

- A - You can set up a System database and begin defining Microsoft Dynamics SL non financial data without setting up Application databases.
- B - If you will be using multiple Application databases, Microsoft Dynamics SL requires you to identify all Application databases before beginning regular operations.

C - You need to set up the System database and at least one Application database before beginning regular operations.

D - You create the System database before you sign onto Microsoft Dynamics SL and then create the Application databases after you sign in.

**Answer: C**

**Question: 69**

After installing Solomon, how do you implement SQL Server database security?

A - Define database security using the administrative tools SQL Server provides for establishing the logical security layer

B - Log into Microsoft Dynamics SL and apply a password in the Database Administration screen

C - Select Set SQL Server security from the NT Administrative Tools, Administrative Wizard

D - Changing the Microsoft Dynamics SL SYSADMIN password activates SQL security

**Answer: B**

**Question: 70**

What screen resolution is recommended for on-screen display of Microsoft Dynamics SL windows?

A - 640 x 480

B - 800 x 600

C - 1024 x 766

D - 1280 x 1024

**Answer: C**

**Question: 71**

What backup scheme would be the most efficient for a company that has a high transaction volume that is concerned with the amount of data that could be lost?

A - A full backup nightly.

B - A full backup weekly and transaction log backups throughout the day.

C - A full backup weekly, a differential backup nightly and transaction log backups throughout the day.

D - A full backup weekly and transaction log backups nightly.

**Answer: C**

**Question: 72**

Which of the following statements about FRX installation are false? Choose the 3 that apply.

A - FRX program files must be installed on each client workstation

B - Universal Naming Convention (UNC) is not supported.

C - The FRX program icons must be installed in a program folder under the Solomon program folder.

D - During a installation you can install either the Professional or Desktop editions of FRx.

**Answer: A, B, C**

**Question: 73**

Which of the following would be considered an “Initialization” process as opposed to “normal operation”?

A - Enter vouchers & adjustments

B - Load the database with beginning balances and historical data

C - Make a backup of the database

D - Run Physical Database integrity

**Answer: B**

**Question: 74**

Steve has Insert rights to the Journal Transaction screen in Microsoft Dynamics SL. The Managers group has Update rights to the Journal Transaction screen in Microsoft Dynamics SL. Steve is a member of the Managers group. Which of the following is true?

A - Steve will have Insert rights because individual user rights override group rights.

B - Steve will have Update rights because group rights override individual rights.

C - Steve will have no rights, because the rights conflict.

D - Steve is not allowed to be in a group because he has individually assigned rights.

**Answer: A**

**Question: 75**

How many times can you access Microsoft Dynamics SL while it is in Trial Loc mode before the system will require registration keys to continue using the product?

A - 25

B - 20

C - 10

D - 5

**Answer: B**

**Question: 76**

What user is logged into SQL server when using Microsoft Dynamics SL?

A - “Administrator”

B - SQL Server

C - “SYSADMIN”

D - “Master 6OSP”

**Answer: D**

**Question: 77**

What back up scheme would be best for a company that has a lower transaction volume that is concerned with a fast recovery?

A - A full backup weekly and transaction log backups throughout the day.

B - A full backup weekly, a differential backup nightly and transaction log backups throughout the day.

C - A full backup weekly.

D - A full backup each night.

**Answer: D**

**Question: 78**

When installing Microsoft Dynamics SL to a workstation that is running Windows XP, what account should you be logged into the computer with?

A - Administrator

B - Power User

C - It does not matter for Windows XP

D - User

**Answer: A**

**Question: 79**

Which option should you select when installing Crystal Reports for use with Microsoft Dynamics SL?

A - Local Install (Typical)

B - Partial Local Install (Custom)

C - NetworkInstall

D - Partial Network Install

**Answer: A**

**Question: 80**

Which of the following is NOT included in Microsoft Dynamics SL security?

A - Grant access to a specific field in a window

B - Grant access to view screens

C - Grant access to initialize data

D - Grant access to view reports

**Answer: A**

**Question: 81**

What Microsoft Dynamics SL window would you open to setup and maintain the relationship between system and application databases?

- A - Event Log Viewer (95.290.00)
- B - Database Administration (98.270.00)
- C - Database Physical Integrity (95.500.00)
- D - Database Update (DS.UPD.ATE)

**Answer: B**

**Question: 82**

Which of the following options can you change within Microsoft Dynamics SL? Choose the 2 that apply.

- A - Control the display of grid row numbers
- B - Define a network drive
- C - Define shortcut keys
- D - Control the display of grid lines

**Answer: A, D**

**Question: 83**

Which Microsoft Dynamics SL menu would you open to import data from other applications?

- A - File - Import
- B - Module - Transaction Import
- C - Utility- Transaction Import
- D - Edit - Import Data

**Answer: C**

**Question: 84**

If a module's logical integrity check reports an integrity error, what options do you have to correct it?

- A - Manually change the data table
- B - Rewrite the record to match the contents of the data file
- C - Add another record
- D - Re-execute the module's integrity check, this time running the correct or re-build option

**Answer: D**

**Question: 85**

What is the purpose of the Microsoft Dynamics SL Navigation Level function?

- A - Control how the cursor moves through a Microsoft Dynamics SL window when you are pressing the TAB key.
- B - Rearrange the order Microsoft Dynamics SL modules are listed on the Module menu according to user-specified settings.
- C - Establish user-defined settings that automatically open certain Microsoft Dynamics SL windows when the user logs into Solomon.
- D - Control how Microsoft Dynamics SL navigates through batch or document records.

**Answer: D**

**Question: 86**

What indicates that a text note is attached to a data item?

- A - The note icon displays with lines when focus is placed on the data item to which it is attached.
- B - The note pops up when focus is placed on the data item to which it is attached.
- C - The data item to which a note is attached displays in red.
- D - You can't tell which data items have notes.

**Answer: A**

**Question: 87**

Which of the following situations would prompt you to run a module integrity check? Choose the 2 that apply.

- A - Customer balance in Customer Maintenance does not match the total of documents on the Customer Trial Balance Report
- B - Accounts Receivables history does not correspond to documents
- C - Users receive an error when they attempt to open an Accounts Receivable screen
- D - Un-released Accounts Payables batches are not showing the vendor history

**Answer: A, B**

**Question: 88**

What is a Microsoft Dynamics SL template?

- A - A general Microsoft Dynamics SL window customization that serves as the basis for userspecific customizations of the same window.
- B - An Application database that contains core data (accounts, sub accounts, etc.) used by all Application databases from which you can quickly create other Application databases.
- C - A set of commonly used window data saved and entered as a block to help reduce a repetitive keying in the window.
- D - The default settings from Microsoft Dynamics SL application setup windows that appear in data entry and maintenance windows.

**Answer: C**

**Question: 89**

Microsoft Dynamics SL's extended report options include which of the following? Choose the 2 that apply.

- A - Options for sorting and selecting
- B - Microsoft Dynamics SL short-cut keys
- C - Total and page break settings
- D - Options for deleting records

**Answer: A, C**

**Question: 90**

Which Microsoft Dynamics SL toolbar button(s) would you click to save the current record and prepare for entry of a new record? Choose the 2 that apply.

- A - Save +New
- B - Close +New
- C - Close
- D - Finish

**Answer: A, D**

**Question: 91**

Which of the following are true of Microsoft Dynamics SL templates? Choose the 2 that apply.

- A - The template level options are the same for all Microsoft Dynamics SL windows.
- B - Templates can be private or public.
- C - Templates can be created for reports as well as data entry, maintenance, and setup windows.
- D - Templates are not a feature of Microsoft Dynamics SL.

**Answer: B, C**

**Question: 92**

If you are working in one Application database and want to begin working in another Application database how do you login to the new company? Choose the 3 that apply.

- A - Exit Microsoft Dynamics SL after saving all changes; then start a new session choosing the new company.
- B - Use Microsoft Dynamics SL's Close Company function to close the current database; then, use the Open Company command to open the new database.
- C - Simply use Microsoft Dynamics SL's Open Company function; Microsoft Dynamics SL supports multiple Application databases open at the same time.
- D - Use the Switch Company icon to exit and login to a new company.

**Answer: A, B, D**

**Question: 93**

Which of the following is NOT a Microsoft Dynamics SL Edit menu function? Choose the 2 that apply.

- A - Cut
- B - Copy
- C - Select All
- D - Initialize

**Answer: C, D**

**Question: 94**

Which of the following are standard Microsoft Dynamics SL selections on the printer options screen? Choose the 3 that apply.

- A - Print to File
- B - Convert to a Microsoft Word Document
- C - Save As Default
- D - Use Windows Default Printer

**Answer: A, C, D**

**Question: 95**

Which of the following statements are true with regard to backing-up Microsoft Dynamics SL program and data files? Choose the 3 that apply.

- A - The System and the Application databases should be backed-up on a daily basis..
- B - The Solomon\Usr\_Rpts directory should be backed-up whenever a report is customized.
- C - Program files can be backed-up but it is not absolutely necessary as they may also be reinstalled from the CD-ROM.
- D - It is only necessary to backup application databases.

**Answer: A, B, C**

**Question: 96**

What is the purpose of a Microsoft Dynamics SL test installation?

- A - To create an online backup of the Microsoft Dynamics SL installation
- B - To provide a test environment for creating templates, developing customizations and testing updates before they are installed on the live installation
- C - To provide a single user working copy of the Microsoft Dynamics SL system to use in the event of a network system failure
- D - There is no benefit to creating a test installation

**Answer: B**

**Question: 97**

Which of the following is true of Microsoft Dynamics SL's multi-item copy and paste functions? Choose the 2 that apply.

- A - The multi-item selection can only be copied from an existing record to a new record in the same Microsoft Dynamics SL window.
- B - Multi-items selected and copied in a random pattern must be pasted into their destination using the same random pattern.
- C - If the copying order of a multi-item selection is sequential, the pasting order does not have to be specified as long as the destination is using the same sequential order.
- D - Multi-item selections do not include system calculated items.

**Answer: C, D**

**Question: 98**

How can you access the inquiry window on a field that supports this feature? Choose the 2 that apply.

- A - Press the F3 key.
- B - Click the Inquiry button next to the field.
- C - Press the F4 key.
- D - Double right click in the field.

**Answer: A, D**

**Question: 99**

How do you switch between grid view and form view in Microsoft Dynamics SL windows? Choose the 2 that apply

- A - Toggle the grid functions on and off in the Options menu.
- B - Double-click the left mouse button when the cursor is over one of the window's detail area headings.
- C - Press ALT + G and ALT + F as necessary
- D - Place the cursor in a detail area field and press F4.

**Answer: B, D**

**Question: 100**

Which of the following items should be included in the regular Microsoft Dynamics SL database backup procedure Choose the 2 that apply.

- A - Microsoft Access database files
- B - Third party Microsoft Dynamics SL product data files
- C - Custom Microsoft Dynamics SL reports
- D - Lotus Notes database files

**Answer: B, C**

**Question: 101**

Which of the following are key elements of the computer system inventory you should conduct before installing Microsoft Dynamics SL? Choose the 3 that apply.

- A - Document network interface card (NIC) data
- B - Verify available RAM meets recommendations
- C - Verify available hard drive space
- D - Verify you have a 32 bit sound card

**Answer: A, B, C**

**Question: 102**

Microsoft Dynamics SL's access security functions include which of the following? Choose the 3 that apply.

- A - Controlling who can and cannot log into Microsoft Dynamics SL.
- B - Enabling and disabling Microsoft Access database security functions.
- C - Identifying database users and groups.
- D - Controlling who does and does not have access rights to certain Microsoft Dynamics SL windows.

**Answer: A, C, D**

**Question: 103**

When installing SQL Server to be used with Microsoft Dynamics SL, you must do which of the following? Choose the 2 that apply.

- A - Install with the default character set.
- B - Install it on the same server as Microsoft Dynamics SL.
- C - Set the sa user's password to "Master".
- D - Install with the default sort order

**Answer: A, D**

**Question: 104**

Which Microsoft versions of Windows are supported for a Microsoft Dynamics SL client installation? Choose the 2 that apply.

- A - Window 95
- B - Windows 2003
- C - Windows XP Professional
- D - Windows 2000 Professional

**Answer: C, D**

**Question: 105**

What is the purpose of referential Integrity?

- A - Enforces the relationship between a Microsoft Dynamics SL system database and its application databases.
- B - Enforces the relationship between database tables.
- C - Enforces the relationship between the Microsoft Dynamics SL System Manager module and all other Microsoft Dynamics SL modules.
- D - Enforces the relationship among all windows (data entry, maintenance, processing, reporting) making up a Microsoft Dynamics SL module.

**Answer: B**

**Question: 106**

What Microsoft Dynamics SL module must be installed and set up to allow the scheduling and off loading of processes to a designated machine?

- A - General Ledger
- B - Accounts Payable
- C - Accounts Receivable
- D - Application Server

**Answer: D**

**Question: 107**

Good implementation policies recommend a “pre-installation” process. Which of the following should be included in a pre-installation process? Choose the 3 that apply.

- A - You can optionally activate Microsoft SQL Server’s referential integrity capabilities to extend the referential integrity capabilities of Solomon.
- B - Protect the data of any current accounting software that Microsoft Dynamics SL is replacing.
- C - Verify adequate hardware and software resources to run Microsoft Dynamics SL..
- D - Obtain the tools and resources used before, during and after the installation of Microsoft Dynamics SL program files.

**Answer: B, C, D**

**Question: 108**

What remote connectivity solutions does Microsoft Dynamics SL support running on?

- A - The client installed on a workstation that is connected to the server by a T1 line. (WAN)
- B - Windows Terminal Server
- C - PC Anywhere
- D - A dial up connection

**Answer: B**

**Question: 109**

Which of the following can increase a Microsoft Dynamics SL Application database's hard disk storage requirements? Choose the 3 that apply.

- A - The volume of transactions processed
- B - The Microsoft Dynamics SL modules being used
- C - Transaction detail retention settings
- D - Installation of application help files

**Answer: A, B, C**

**Question: 110**

You wish to deploy Microsoft Dynamics SL in an environment with 34 concurrent users. Which edition needs to be installed?

- A - Single-User Microsoft Dynamics SL Standard Edition
- B - Multi-User Microsoft Dynamics SL Standard Edition
- C - Microsoft Dynamics SL Enterprise Edition
- D - Microsoft Dynamics SL Professional

**Answer: D**

**Question: 111**

When analyzing a company for Standard Edition vs. Professional Edition for Microsoft Dynamics SL, what profiles would be most suitable for Standard Edition? Choose the 2 that apply.

- A - Use Flex key capability to segment the Inventory ID
- B - 15 users using Solomon six to eight hours/day
- C - 10 or less users
- D - Need Multi-company processing

**Answer: A, C**

**Question: 112**

Which of the following statements about the Microsoft Dynamics SL System database is raise?

- A - The System database contains Microsoft Dynamics SL product registrations, security settings and database field attributes.
- B - The System database does contain some accounting data.
- C - A separate System database must be created for each Application database you define.
- D - The System database eliminates the need for redundant system-level information in Application databases.

**Answer: C**

**Question: 113**

Which of the following cannot be installed from the Microsoft Dynamics SL CD(S)?

- A - Seagate Crystal Reports
- B - Microsoft Dynamics SL Tools for Visual Basic
- C - Microsoft SQL Server
- D - Microsoft Dynamics SL Kernel (SWIM)

**Answer: C**

**Question: 114**

When consulting with a customer in regard to needed hard disk space for Microsoft Dynamics SL databases, which of the following responses would you choose?

- A - A typical system and application database together will not require more than 100 MBs
- B - A typical system and application database together will require a minimum of 1GB required
- C - A typical system and application database together need anywhere from 30 GBs to several hundred GBs
- D - A typical system and application database together need anywhere from 300 MBs to several GBs

**Answer: D**

**Question: 115**

What resources does the Microsoft Dynamics SL Kernel, Swimapi.dll, interface with? Choose the 3 that apply.

- A - Customization Manager module
- B - Application modules and report writers
- C - Microsoft SQL Server
- D - Internet Explorer

**Answer: A, B, C**

**Question: 116**

What two Microsoft Dynamics SL registration keys are required?

- A - General Ledger and Accounts Payable
- B - General Ledger and System Manager
- C - System Manager, General Ledger, Accounts Payable and Accounts Receivable
- D - System Manager and FRx

**Answer: B**

**Question: 117**

Which of the following is NOT included in Microsoft Dynamics SL security?

- A - Grant access to a specific field in a window
- B - Grant access to view screens
- C - Grant access to initialize data
- D - Grant access to view reports

**Answer: A**

**Question: 118**

When you start the Microsoft Dynamics SL Setup program, which action does Setup perform automatically?

- A - Shut down any other currently running Windows applications
- B - Determine whether or not the server needs a newer version of OLE
- C - Detect whether or not Microsoft SQL Server is installed and prompt you to install it if it is not
- D - Open the Welcome window on first-time installations, open the Select Solomon

**Answer: B**

**Question: 119**

When installing Microsoft Dynamics SL to a workstation that is running Windows XP, what account should you be logged into the computer with?

- A - Administrator
- B - Power User
- C - It does not matter for Windows XP
- D - User

**Answer: A**

**Question: 120**

How many times can you access Microsoft Dynamics SL while it is in TrialLoc mode before the system will require registration keys to continue using the product?

- A - 25
- B - 20
- C - 10
- D - 5

**Answer: B**

**Question: 121**

Which standard Microsoft Dynamics SL application provides the ability to customize a standard report, such as the General Ledger Trial Balance?

- A - Microsoft Dynamics SL tools for Visual Basic

- B - Microsoft Dynamics SL Customization Manager
- C - FRx
- D - Crystal Reports

**Answer: D**

**Question: 122**

Which is the correct order of Microsoft Dynamics SL user access rights from most to least restrictive?

- A - View, insert, update, delete, initialization
- B - View, update, insert, initialization, delete
- C - View, update, insert, delete, initialization
- D - View, update, delete, insert, initialization

**Answer: C**

**Question: 123**

After installing Solomon, how do you implement SQL Server database security?

- A - Define database security using the administrative tools SQL Server provides for establishing the logical security layer
- B - Log into Microsoft Dynamics SL and apply a password in the Database Administration screen
- C - Select Set SQL Server security from the NT Administrative Tools, Administrative Wizard
- D - Changing the Microsoft Dynamics SL SYSADMIN password activates SQL security

**Answer: B**

**Question: 124**

Which of the following are true statements about Microsoft Dynamics SL product registration? Choose the 3 that apply.

- A - Microsoft Dynamics SL must be registered immediately after you install the programs and set up your first System-Application database.
- B - If the company name on the registration screen is changed, the current unlocking keys will no longer be valid.
- C - Registering Microsoft Dynamics SL does not erase or alter any of the financial data stored in a database prior to registration.
- D - If Microsoft Dynamics SL is not registered within 20 database accesses, the application automatically makes the database inaccessible.

**Answer: B, C, D**

**Question: 125**

Which of the following should not cause problems with a Microsoft Dynamics SL installation?

- A - Conflicting .dlls
- B - Inadequate RAM
- C - Using a USB keyboard and mouse
- D - Out of date Windows and SQL Server service packs

**Answer: C**

**Question: 126**

How do you access the Database Maintenance program to create a new Application database?

- A - From the Utility menu within Microsoft Dynamics SL
- B - It is run from the Utility menu list
- C - It is run from the icon in the Microsoft Dynamics SL program folder
- D - It is an option in the Microsoft SQL Server Enterprise Manager program after the initial installation of Solomon

**Answer: C**

**Question: 127**

Which of the following would be considered an “Initialization” process as opposed to “normal operation”?

- A - Enter vouchers & adjustments
- B - Load the database with beginning balances and historical data
- C - Make a backup of the database
- D - Run Physical Database Integrity

**Answer: B**

**Question: 128**

What user is logged into SQL server when using Microsoft Dynamics SL?

- A - “Administrator”
- B - SQL Server
- C - “SYSADMIN”
- D - “Master 60OSP”

**Answer: D**

**Question: 129**

What needs to be done to prepare Microsoft Dynamics SL Application database for use?

- A - Define the referential relationships between the new database’s data tables.
- B - Set database’s account and sub account cross references in the System database’s Acctxref

and SubRef tables

C - Perform DB Update to Import messages.csv, rptcontrol.csv, pvrec.csv.

D - Create user logins to Solomon Application databases.

**Answer: C**

**Question: 130**

Which of the following is the recommended way to install Microsoft Dynamics SL supporting products?

A - Double-click their setup program icon from the appropriate directory on the Microsoft Dynamics SL CD.

B - Simply follow the prompts; Microsoft Dynamics SL Setup automatically starts each supporting product's setup program as soon as installation of Microsoft Dynamics SL is complete.

C - Select each products installation option from the opening Microsoft From the Microsoft Dynamics SL Installation window that displays when you insert the Microsoft Dynamics SL CD.

D - Choose Start - Run, type in or browse to the appropriate path and file name, and click OK.

**Answer: C**

**Question: 131**

How do you re-route a Microsoft Dynamics SL report to a file?

A - Use the report window's Print Preview functions. click the Print button, and define the output file name.

B - Use the report window's Template tab to set up a report template with the report file name as the output device option.

C - Click the print options button and use the Print Options (98.20.00) window to choose Print to File.

D - Select the Print to File option on the Company Selection tab.

**Answer: C**

**Question: 132**

Which of the following situations would prompt you to run a module integrity check? Choose the 2 that apply.

A - Customer balance in Customer Maintenance does not match the total of documents on the Customer Trial Balance Report

B - Accounts Receivables history does not correspond to documents

C - Users receive an error when they attempt to open an Accounts Receivable screen

D - Un-released Accounts Payables batches are not showing the vendor history

**Answer: A, B**

**Question: 133**

What is the purpose of a Microsoft Dynamics SL test installation?

- A - To create an online backup of the Microsoft Dynamics SL installation
- B - To provide a test environment for creating templates, developing customizations and testing updates before they are installed on the live installation
- C - To provide a single user working copy of the Microsoft Dynamics SL system to use in the event of a network system failure
- D - There is no benefit to creating a test installation

**Answer: B**

**Question: 134**

How do you change the password for the Master user?

- A - Use Microsoft Enterprise Manager to change the password for the Master Login.
- B - Log into Microsoft Dynamics SL as Sysadmin and then open the Change Password screen on the Utility menu.
- C - Open the Database Administration screen and change the password on the line with a blank Database Name field.
- D - Master's password can not be changed after it is set during the initial creation of the database.

**Answer: C**

**Question: 135**

What is a Microsoft Dynamics SL template?

- A - A general Microsoft Dynamics SL window customization that serves as the basis for userspecific customizations of the same window.
- B - An Application database that contains core data (accounts, sub accounts, etc.) used by all Application databases from which you can quickly create other Application databases.
- C - A set of commonly used window data saved and entered as a block to help reduce a repetitive keying in the window.
- D - The default settings from Microsoft Dynamics SL application setup windows that appear in data entry and maintenance windows.

**Answer: C**

**Question: 136**

Which of the following methods efficiently duplicates frequently used data in Microsoft Dynamics SL screens?

- A - Alt-Print Screen
- B - Templates
- C - Control-Print Screen

D - Tabs

**Answer: B**

**Question: 137**

What is initialize mode typically used for? Choose the 2 that apply.

A - Setting up the database's chart of accounts, sub account, and budgeting structure

B - Importing the information contained in .csv files: messages, possible values, report controls, window settings

C - Entering beginning account balances and historical data

D - Allows an installation to pick a starting point for entering existing accounting information into Microsoft Dynamics SL

**Answer: C, D**

**Question: 138**

Which Microsoft Dynamics SL toolbar button(s) would you click to save the current record and prepare for entry of a new record? Choose the 2 that apply.

A - Save +New

B - Close +New

C - Close

D - Finish

**Answer: A, D**

**Question: 139**

If a module's logical integrity check reports an integrity error, what options do you have to correct it?

A - Manually change the data table

B - Rewrite the record to match the contents of the data file

C - Add another record

D - Re-execute the module's integrity check, this time running the correct or re-build option

**Answer: D**

**Question: 140**

Which of the following statements are true with regard to backing-up Microsoft Dynamics SL program and data files? Choose the 3 that apply.

A - The System and the Application databases should be backed-up on a daily basis..

B - The Solomon\Usr\_Rpts directory should be backed-up whenever a report is customized.

C - Program files can be backed-up but it is not absolutely necessary as they may also be reinstalled from the CD-ROM.

D - It is only necessary to backup application databases.

**Answer: A, B, C**

**Question: 141**

Which of the following items should be included in the regular Microsoft Dynamics SL database backup procedure? Choose the 2 that apply.

- A - Microsoft Access database files
- B - Third party Microsoft Dynamics SL product data files
- C - Custom Microsoft Dynamics SL reports
- D - Lotus Notes database files

**Answer: B, C**

**Question: 142**

Microsoft Dynamics SL's extended report options include which of the following? Choose the 2 that apply.

- A - Options for sorting and selecting
- B - Microsoft Dynamics SL short-cut keys
- C - Total and page break settings
- D - Options for deleting records

**Answer: A, C**

**Question: 143**

How do you switch between grid view and form view in Microsoft Dynamics SL windows? Choose the 2 that apply.

- A - Toggle the grid functions on and off in the Options menu.
- B - Double-click the left mouse button when the cursor is over one of the window's detail area headings.
- C - Press ALT + G and ALT + F as necessary.
- D - Place the cursor in a detail area field and press F4.

**Answer: B, D**

**Question: 144**

Which of the following is true of Microsoft Dynamics SL's multi-item copy and paste functions? Choose the 2 that apply.

- A - The multi-item selection can only be copied from an existing record to a new record in the same Microsoft Dynamics SL window.
- B - Multi-items selected and copied in a random pattern must be pasted into their destination using the same random pattern.
- C - If the copying order of a multi-item selection is sequential, the pasting order does not have to

be specified as long as the destination is using the same sequential order.  
D - Multi-item selections do not include system calculated items.

**Answer: C, D**

**Question: 145**

What is the extent of Microsoft Dynamics SL's module-level logical integrity checking capabilities?  
Choose the 2 that apply.

- A - Compare
- B - Validate
- C - Rebuild Indexes
- D - Delete Indexes

**Answer: A, B**

**Question: 146**

Which of the following are standard Microsoft Dynamics SL selections on the printer options screen? Choose the 3 that apply.

- A - Print to File
- B - Convert to a Microsoft Word Document
- C - Save As Default
- D - Use Windows Default Printer

**Answer: A, C, D**

**Question: 147**

How can you access the inquiry window on a field that supports this feature? Choose the 2 that apply

- A - Press the F3 key.
- B - Click the inquiry button next to the field.
- C - Press the F4 key.
- D - Double right click in the field.

**Answer: A, D**

**Question: 148**

What is the purpose of the Microsoft Dynamics SL Navigation Level function?

- A - Control how the cursor moves through a Microsoft Dynamics SL window when you are pressing the TAB key.
- B - Rearrange the order Microsoft Dynamics SL modules are listed on the Module menu according to user-specifier settings.

C - Establish user-defined settings that automatically open certain Microsoft Dynamics SL windows when the user logs into Solomon.

D - Control how Microsoft Dynamics SL navigates through batch or document records.

**Answer: D**

**Question: 149**

If you are working in one Application database and want to begin working in another Application database how do you login to the new company? Choose the 3 that apply.

A - Exit Microsoft Dynamics SL after saving all changes; then start a new session choosing the new company.

B - Use Microsoft Dynamics SL's Close Company function to close the current database; then, use the Open Company command to open the new database.

C - Simply use Microsoft Dynamics SL's Open Company function; Microsoft Dynamics SL supports multiple Application databases open at the same time.

D - Use the Switch Company icon to exit and login to a new company.

**Answer: A, B, D**

**Question: 150**

Which of the following options can you change within Microsoft Dynamics SL? Choose the 2 that apply.

A - Control the display of grid row numbers

B - Define a network drive

C - Define shortcut keys

D - Control the display of grid lines

**Answer: A, D**
