No Pass No Pay!

**MCSE, CCNA, CCNP, OCP, CIW, JAVA, Sun Solaris, Checkpoint
World No 1 Cert Guides**

**Axapta 3.0 Questionnaire
MB6-283**

Congratulations!

You have purchased a TestKingonline. Study Guide.

This study guide is a complete collection of questions and answers that have been developed by our professional & certified team. You must study the contents of this guide properly in order to prepare for the actual certification test. The average time that we would suggest you for studying this study guide is approximately 10 to 20 hours and you will surely pass your exam. We guarantee it!

GOOD LUCK!

Question: 1

You are asking a question that requires a respondent to choose more than one way to deal with a given scenario. You therefore need to allow the respondent to provide more than one response to the question. Which of the following input types should you choose?

- A - Combo box
- B - Alternative box
- C - Check box
- D - Multi box

Answer: C

Question: 2

When setting up a questionnaire, what impact does selecting the All check box have?

- A - All respondents must answer the questionnaire
- B - All questions in a questionnaire must be served to the respondent
- C - All questions must be answered correctly
- D - All questions must be answered to complete the questionnaire

Answer: D

Question: 3

Which of the following are elements in a questionnaire?

- A - Question template
- B - Question type
- C - Form template
- D - Form type

Answer: B, C

Question: 4

You want to create a questionnaire that you will use as a test at the end of a course. Respondents will need to achieve a certain score in order to receive credit for passing the course. Which of the following are setup fields on answers that allow you to use scoring?

- A - Points
- B - Max. Number of points
- C - Mm. Number of points
- D - Correct answer

Answer: A, D

Question: 5

You are creating a questionnaire in which you'll evaluate point scores, so you therefore need to select the method you want to use to calculate results. On which of the following do you indicate the result calculation method you want to use?

- A - Result group
- B - Question
- C - Answer
- D - Answer group

Answer: B

Question: 6

Because some components of a questionnaire are directly related to others, such as questions and answers (response options), when creating a new questionnaire you must create some elements in a particular order. Which of the following describes when you should create an answer group?

- A - Before a question, but after a Questionnaire
- B - Before a question
- C - After a question, but before a Questionnaire
- D - Before a question, but after a result group

Answer: B

Question: 7

When using a conditional question structure on a questionnaire, which of the following elements determines which question will be asked after the primary question?

- A - Question
- B - Answer
- C - Sequence number
- D - Result group

Answer: B

Question: 8

Which of the following options can you select as the input type for an open question?

- A - Check box
- B - Alternative button
- C - Combo box
- D - Text

Answer: D

Question: 9

When setting up a questionnaire, which of the following information is mandatory?

- A - Questions
- B - Answer groups
- C - Answers C
- D - Questionnaire type

Answer: D

Question: 10

What are result groups used for?

- A - Allocating points to questions
- B - Allocating points to answers
- C - Collecting points allocated to questions
- D - Collecting points allocated to answers

Answer: D

Question: 11

You are creating a questionnaire that tests knowledge in three subject areas. To sort points achieved according to each subject area you can create three result groups, one for each subject. From which form do you create result groups?

- A - From the Questionnaire form
- B - From the Question form
- C - From the Answer group form
- D - In the Setup menu

Answer: A

Question: 12

You have a specific question that is particularly important for determining the scope of a respondent's knowledge about a given subject, and you want to add sub-questions to further explore the subject on the same page of the questionnaire. What do you need to do?

- A - You must select the Several rows check box on the General tab page of the Question form, and use the same response type for all sub-questions
- B - You can add sub-questions at any time by simply asking questions in a logical sequence
- C - You can add your sub-questions on the Text tab of the question so that they will be displayed along with the original question
- D - You cannot ask sub-questions

Answer: A

Question: 13

Which of the following roles related to questionnaires is supported by the Enterprise Portal?

- A - Microsoft Axapta administrator
- B - Line manager
- C - Customer
- D - Questionnaire participant

Answer: D

Question: 14

When you want to calculate results for a questionnaire based on points assigned to the questions, which of the following selections should you make on the Questions form?

- A - You should choose Question in the Result calculation field, and then select the result group(s) to which you want to distribute points
- B - You should choose None in the Result calculation field, and then select the result group(s) to which you want to distribute the points
- C - You should choose Question in the Result calculation field, and then select the Mandatory check box to ensure that respondents complete the question
- D - Since you can only assign points to answers, you cannot calculate points for questions

Answer: A

Question: 15

Which of the following applies to the Back button?

- A - Disabling it will also temporarily disable the Back button in a browser
- B - Disabling it will not disable the Back button in a browser
- C - Enabling it will freeze all browser navigation features
- D - Enabling it will make the questionnaire executable in a browser

Answer: B

Question: 16

When designing a questionnaire, you cannot activate the Back and Overview buttons for which of the following sequence type(s)?

- A - Sequence
- B - Random in questionnaire
- C - Random in result group
- D - Conditional

Answer: D

Question: 17

When a respondent is completing a questionnaire with open questions, which of these functionalities is available?

- A - Percentage for question sequence
- B - All, meaning that all questions in the questionnaire must be answered
- C - The Back navigation button
- D - The Notes button

Answer: D

Question: 18

What does the Total time field on the Questionnaire indicate?

- A - Exactly how long you want the questionnaire to be open during an answer session, regardless of how many questions the respondent has answered
- B - How much time all respondents have spent on answering the questionnaire
- C - An estimate of how long time it should take the average respondent to finish
- D - How much time was spent developing the questionnaire (used for budgeting design time for future questionnaires)

Answer: A

Question: 19

In the Planned answer session form, you create an answer session during which one employee will evaluate another. In which of the following fields can you indicate the relationship between the two employees?

- A - Executed by
- B - Role
- C - Person
- D - Evaluation of

Answer: B

Question: 20

Where do you set up a Microsoft Axapta user who is to respond to a questionnaire?

- A - In the User field on the Employee table
- B - In the Employee field on the Microsoft Axapta User table
- C - In the Access control list for employees
- D - In the Questionnaire user field on the Microsoft Axapta User table

Answer: A

Question: 21

What can you view when you are completing a questionnaire on the Enterprise Portal?

- A - View information regarding questionnaires, but only those that have been planned for you
- B - View information regarding questionnaires, but only those that have been planned for your organization unit
- C - View information regarding all currently active questionnaires
- D - View statistics for answers to all completed questionnaires

Answer: A

Question: 22

What does allocating points to response options (answers) allow you to do?

- A - Control the probability with which the answer should appear in a random serving of answers
- B - Indicate how important it is for the respondent to answer the question
- C - Calculate how many times the question was answered correctly
- D - Accumulate figures for statistical analysis

Answer: D

Question: 23

What can a questionnaire administrator do on the Enterprise Portal?

- A - View all Planned answer sessions for all questionnaires
- B - Determine who should be given the right to complete a questionnaire
- C - View statistics related to all questionnaires
- D - Alter the results of specific questionnaires

Answer: A

Question: 24

When creating a questionnaire scheduling, what can you use the Scheduling button to do?

- A - Create a new scheduling
- B - Issue planned answer sessions for the respondents already chosen
- C - Select respondents and questionnaires for the schedule
- D - Book the scheduling in respondents' Outlook calendars

Answer: C

Question: 25

How do you set up user rights on a questionnaire?

- A - You link a virtual network group to the questionnaire
- B - You link a Microsoft Axapta user group to the questionnaire
- C - You link a Microsoft Axapta user to the questionnaire
- D - It is not possible to set up user rights on the questionnaire

Answer: A

Question: 26

On the Results tab of the Questionnaire form, which of the following is not a setup parameter used for managing results?

- A - Point statistics
- B - Answer report
- C - Results report
- D - Results page

Answer: C

Question: 27

In statistical analysis, what does the Profile Type grouping criterion allow you to do?

- A - Create a statistical profile which can be compared to other profiles
- B - Categorize respondents into profiles for further questions
- C - Use master data on respondents that were not entered in the questionnaire, based on their profile
- D - Retrieve the training profile type for all employees that responded to the questionnaire

Answer: C

Question: 28

When you are creating a conditional questions structure, in addition to building the question hierarchy, what other setting is mandatory?

- A - Must be completed
- B - Sequence number
- C - Result group
- D - Save question

Answer: A

Question: 29

Which of the following is not a view option in statistical analysis?

- A - Question ID
- B - Question Text
- C - Result group ID
- D - Result calculation

Answer: D

Question: 30

Which of the following evaluation parameters can you use when a questionnaire is being used for testing to determine whether the respondent has passed?

- A - Correct points
- B - Correct answers
- C - Points in total
- D - Feedback analysis

Answer: B, C

Question: 31

When providing instructions for complex questions, you need to help respondents distinguish between your instructions and the question text. To help them do so, what must you always remember to do?

- A - Attach a media file that highlights the question and the instruction areas on the questionnaire
- B - Format the instruction text with bold, or use a larger font than used on the question
- C - Select Text as the question's input type to automatically format the instructions and question appropriately
- D - Insert at least one line (carriage return) after the instruction text

Answer: D

Question: 32

When setting up calculation rules in the statistical analysis, and choosing the Questionnaire level calculation rule, which of the following can you also apply to further delimit your analysis?

- A - Result group
- B - Question
- C - Question, if you first delimit by result group
- D - Neither result group nor by question

Answer: D

Question: 33

From the Scheduling form you can automatically create Web users and assign access rights to the questionnaire for respondents for whom you've created a related planned answer session. When you do so, which of the following happens?

- A - Microsoft Axapta only creates web users for respondents who are internal employees, and automatically assigns access rights to the questionnaire
- B - Microsoft Axapta creates web users for all respondents assigned to the related planned answer sessions, however, you must then grant access rights to the questionnaire to each respondent individually

C - Microsoft Axapta creates web users for all respondents assigned to the related planned answer sessions, and automatically grants each respondent access rights to the questionnaire
D - Microsoft Axapta

Answer: C

Question: 34

Your company is comprised of a wide variety of employee demographics, and you've recently distributed an employee satisfaction survey company-wide. When structuring a subsequent statistical analysis, on the Grouping by tab you can select the variables you want to include in the results. What information will the Function grouping criterion provide?

- A - Which calculation function was used in the questionnaire
- B - Which function a respondent from a customer performs
- C - Which function an employee performs in the organization
- D - Which usability functions (back, overview or note) were used in the questionnaire

Answer: A

Question: 35

When you are using points on a questionnaire, you can allow a respondent to view scores for result groups. To do so, which of the following should you select?

- A - Points statistics
- B - Result page
- C - Answer report
- D - Evaluation of

Answer: A, B

Question: 36

Which of the following do you need to create in order to capture point results for answers?

- A - Result groups
- B - Result categories
- C - Result types
- D - Result calculations

Answer: A

Question: 37

Which is the correct sequence for setting up a questionnaire with closed questions?

- A - Questionnaire, Question, Answer group, Result group
- B - Questionnaire, Answer group, Question, Result group

- C - Questionnaire, Result group, Answer group, Question
- D - Result group, Questionnaire, Answer group, Question

Answer: B

Question: 38

When using a conditional question structure on a questionnaire, which of the following elements determines which question will be asked after the primary question?

- A - Question
- B - Answer
- C - Sequence number
- D - Result group

Answer: B

Question: 39

When does a question become a conditional question?

- A - When you create the question, and then select the conditional question type
- B - When you create a question, and then save it as a conditional questionnaire type
- C - As soon as you assign it to a questionnaire for which the conditional question sequence is selected
- D - When you assign it to a questionnaire for which the conditional question sequence is selected, and then use the tree structure to create its dependency on a primary

Answer: D

Question: 40

Because some components of a questionnaire are directly related to others, such as questions and answers (response options), when creating a new questionnaire you must create some elements in a particular order. Which of the following describes when you should create an answer group?

- A - Before a question, but after a Questionnaire
- B - Before a question
- C - After a question, but before a Questionnaire
- D - Before a question, but after a result group

Answer: B

Question: 41

When setting up a questionnaire, what impact does selecting the All check box have?

- A - All respondents must answer the questionnaire
- B - All questions in a questionnaire must be served to the respondent

- C - All questions must be answered correctly
- D - All questions must be answered to complete the questionnaire

Answer: D

Question: 42

You are creating a questionnaire that tests knowledge in three subject areas. To sort points achieved according to each subject area you can create three result groups, one for each subject. From which form do you create result groups?

- A - From the Questionnaire form
- B - From the Question form
- C - From the Answer group form
- D - In the Setup menu

Answer: A

Question: 43

One advantage of using conditional questions on a questionnaire is that you can guide the respondent through the questionnaire. When creating the conditional structure on a questionnaire, the sequence in which primary questions are asked depends on which of the following?

- A - The order in which you assign the questions to the questionnaire
- B - The order in which questions are asked is determined by the sequence number you assign when creating your conditional structure
- C - The order in which questions are asked always follows the original sequence number assigned to them in the Question table
- D - The order in which questions are asked is determined only by their place in the conditional question tree

Answer: D

Question: 44

Which of the following are result calculation methods?

- A - Question
- B - Answer group
- C - Result group
- D - If not answer, then question

Answer: A, D

Question: 45

Which of the following are elements in a questionnaire?

- A - Question template
- B - Question type
- C - Form template
- D - Form type

Answer: B, C

Question: 46

When you want to evaluate point scores on a questionnaire used to test respondent's knowledge of a given subject matter, rather than manually calculate the total number of points respondents can achieve, you can have the system do so for you. Where do you set-up the maximum number of points when you want to calculate results for a completed questionnaire?

- A - Result group
- B - Questionnaire
- C - Question
- D - Answer group

Answer: A

Question: 47

Which of the following options can you select as the input type for a closed question?

- A - Integer
- B - Real
- C - Check box
- D - Text

Answer: C

Question: 48

Which of the following options can you select as the input type for an open question?

- A - Check box
- B - Alternative button
- C - Combo box
- D - Text

Answer: D

Question: 49

From the Planned answer session form, which of the following can you create a planned answer session for?

- A - A select group of respondents
- B - All respondents assigned to a questionnaire

- C - Individual respondents only
- D - Individual respondents and individual organization units

Answer: C

Question: 50

When analyzing the results of a questionnaire, you notice that an employee has exhibited extraordinary aptitude in the subject of the questionnaire. On the Planned answer session form, which of the following fields shows who completed the questionnaire?

- A - Evaluation of
- B - Evaluated by
- C - Executed by
- D - Execution of

Answer: C

Question: 51

What can a questionnaire administrator do on the Enterprise Portal?

- A - View all Planned answer sessions for all questionnaires
- B - Determine who should be given the right to complete a questionnaire
- C - View statistics related to all questionnaires
- D - Alter the results of specific questionnaires

Answer: A

Question: 52

What does the Total time field on the Questionnaire indicate?

- A - Exactly how long you want the questionnaire to be open during an answer session, regardless of how many questions the respondent has answered
- B - How much time all respondents have spent on answering the questionnaire
- C - An estimate of how long time it should take the average respondent to finish
- D - How much time was spent developing the questionnaire (used for budgeting design time for future questionnaires)

Answer: A

Question: 53

You created a number of survey questionnaires that you plan to distribute at regular intervals throughout a particular project. When viewing your list of questionnaires in the Questionnaire overview, what does a division sign on a questionnaire indicate?

- A - The questionnaire should be deleted during the next periodic clean up
- B - That all respondents have not yet completed the questionnaire

- C - The questionnaire contains errors and could not be validated
- D - The questionnaire is not yet active

Answer: D

Question: 54

When composing an e-mail you want to invite respondents to participate in a questionnaire, so you select a place holder that will automatically insert each respondent's name into the e-mail. Which of the following variables must you use?

- A - P
- B - 1
- C - the respondent's login name
- D - The respondents login name only

Answer: A

Question: 55

Which of the following applies to the Back button?

- A - Disabling it will also temporarily disable the Back button in a browser
- B - Disabling it will not disable the Back button in a browser
- C - Enabling it will freeze all browser navigation features
- D - Enabling it will make the questionnaire executable in a browser

Answer: B

Question: 56

When designing a questionnaire, you cannot activate the Back and Overview buttons for which of the following sequence type(s)?

- A - Sequence
- B - Random in questionnaire
- C - Random in result group
- D - Conditional

Answer: D

Question: 57

What does allocating points to response options (answers) allow you to do?

- A - Control the probability with which the answer should appear in a random serving or answers
- B - Indicate how important it is for the respondent to answer the question
- C - Calculate how many times the question was answered correctly
- D - Accumulate figures for statistical analysis

Answer: D

Question: 58

Selecting the Note check box allows you to do what?

- A - Provide the respondent with a note to supplement difficult questions
- B - Provide the respondent with a Note field (free text) on selected questions where notes apply
- C - Provide the respondent with a Note field (free text) on all questions
- D - Allow the respondent to make notes which can be printed out

Answer: C

Question: 59

Which of the following roles related to questionnaires is supported by the Enterprise Portal?

- A - Microsoft Axapta administrator
- B - Line manager
- C - Customer
- D - Questionnaire participant

Answer: D

Question: 60

Where do you set up a Microsoft Axapta user who is to respond to a questionnaire?

- A - In the User field on the Employee table
- B - In the Employee field on the Microsoft Axapta User table
- C - In the Access control list for employees
- D - In the Questionnaire user field on the Microsoft Axapta User table

Answer: A

Question: 61

Your company is comprised of a wide variety of employee demographics, and you've recently distributed an employee satisfaction survey company-wide. When structuring a subsequent statistical analysis, on the Grouping by tab you can select the variables you want to include in the results. What information will the Function grouping criterion provide?

- A - Which calculation function was used in the questionnaire
- B - Which function a respondent from a customer performs
- C - Which function an employee performs in the organization
- D - Which usability functions (back, overview or note) were used in the questionnaire

Answer: A

Question: 62

When you are creating a conditional questions structure, in addition to building the question hierarchy, what other setting is mandatory?

- A - Must be completed
- B - Sequence number
- C - Result group
- D - Save question

Answer: A

Question: 63

You have a question to which you want to attach a supporting media file, for example, a video, graphics or an audio file that will help clarify a complicated question. Where will the media have an effect when the questionnaire is being completed?

- A - Only when it is being completed in Microsoft Axapta
- B - Only when it is being completed through the Enterprise Portal
- C - Only if the participant has the appropriate access rights
- D - Only if you've used the Validate button on the Questionnaire form

Answer: B

Question: 64

Which of the following evaluation parameters can you use when a questionnaire is being used for testing to determine whether the respondent has passed?

- A - Correct points
- B - Correct answers
- C - Points in total
- D - Feedback analysis

Answer: B, C

Question: 65

In statistical analysis, what does the Profile Type grouping criterion allow you to do?

- A - Create a statistical profile which can be compared to other profiles
- B - Categorize respondents into profiles for further questions
- C - Use master data on respondents that were not entered in the questionnaire, based on their profile
- D - Retrieve the training profile type for all employees that responded to the questionnaire

Answer: C

Question: 66

You've just finished setting up a new questionnaire, and you want to be sure that you've correctly designed and assembled all of the components of the questionnaire. Which of the following can you do to perform a full functionality test of the questionnaire?

- A - You can click the Functionality test button
- B - You can use the questionnaire wizard to verify your setup
- C - You can click the Validate button
- D - You can make the questionnaire active, and then run the questionnaire with live data

Answer: D

Question: 67

When providing instructions for complex questions, you need to help respondents distinguish between your instructions and the question text. To help them do so, what must you always remember to do?

- A - Attach a media file that highlights the question and the instruction areas on the questionnaire
- B - Format the instruction text with bold, or use a larger font than used on the question
- C - Select Text as the question's input type to automatically format the instructions and question appropriately
- D - Insert at least one line (carriage return) after the instruction text

Answer: D

Question: 68

When executing a statistical analysis, which of the following is not a calculation function you can select?

- A - Variance
- B - Total
- C - Standard deviation
- D - Median

Answer: D

Question: 69

You have a single question on a survey for which you want to distribute points to multiple result groups. Which of the following result calculation methods allows you to do so?

- A - Question
- B - Answer
- C - Result group
- D - If not answer, then question

Answer: D

Question: 70

On the Results tab of the Questionnaire form, which of the following is not a setup parameter used for managing results?

- A - Point statistics
- B - Answer report
- C - Results report
- D - Results page

Answer: C

Question: 71

Which of the following do you need to create in order to capture point results for answers?

- A - Result groups
- B - Result categories
- C - Result types
- D - Result calculations

Answer: A

Question: 72

When you are using points on a questionnaire, you can allow a respondent to view scores for result groups. To do so, which of the following should you select?

- A - Points statistics
- B - Result page
- C - Answer report
- D - Evaluation of

Answer: A, B

Question: 73

The participants in a course are required to pass a test in order to receive a certificate, but not all participants pass the test and must therefore retake it. To test the participants knowledge of the course material, and not their ability to remember the questions asked on the first test, you can create a question pool from which you draw a certain percentage of the total number of questions in the pool. With which of the following sequence types is this percentage parameter used?

- A - Sequence
- B - Random in questionnaire
- C - Conditional
- D - Random in conditional

Answer: B

Question: 74

When designing a questionnaire, you need to consider how you want respondents to be able to respond to each type of question you ask, which means selecting an appropriate input type. With what types of questions can input types be used?

- A - Closed questions for which respondents can only select one response option
- B - Open ended questions for which respondents can provide free-text responses
- C - Both open and closed questions, providing that you choose the appropriate input type for each
- D - All input types can be used with both open and closed questions

Answer: C

Question: 75

Which is the correct sequence for setting up a questionnaire with closed questions?

- A - Questionnaire, Question, Answer group, Result group
- B - Questionnaire, Answer group, Question, Result group
- C - Questionnaire, Result group, Answer group, Question
- D - Result group, Questionnaire, Answer group, Question

Answer: B

Question: 76

When setting up a questionnaire, which of the following information is mandatory?

- A - Questions
- B - Answer groups
- C - Answers
- D - Questionnaire type

Answer: D

Question: 77

You are creating a questionnaire that tests knowledge in three subject areas. To sort points achieved according to each subject area you can create three result groups, one for each subject. From which form do you create result groups?

- A - From the Questionnaire form
- B - From the Question form
- C - From the Answer group form
- D - In the Setup menu

Answer: A

Question: 78

You want to create a questionnaire that you will use as a test at the end of a course. Respondents will need to achieve a certain score in order to receive credit for passing the course. Which of the following are setup fields on answers that allow you to use scoring?

- A - Points
- B - Max. Number of points
- C - Min. Number of points
- D - Correct answer

Answer: A, D

Question: 79

Which of the following are result calculation methods?

- A - Question
- B - Answer group
- C - Result group
- D - It not answer, then question

Answer: A, D

Question: 80

When you want to evaluate point scores on a questionnaire used to test respondent's knowledge of a given subject matter, rather than manually calculate the total number of points respondents can achieve, you can have the system do so for you. Where do you set-up the maximum number of points when you want to calculate results for a completed questionnaire?

- A - Result group
- B - Questionnaire
- C - Question
- D - Answer group

Answer: A

Question: 81

Which of the following options can you select as the input type for a closed question?

- A - Integer
- B - Real
- C - Check box
- D - Text

Answer: C

Question: 82

You are asking a question that requires a respondent to choose more than one way to deal with a given scenario. You therefore need to allow the respondent to provide more than one response to the question. Which of the following input types should you choose?

- A - Combo box

- B - Alternative box
- C - Check box
- D - Multi box

Answer: C

Question: 83

What are result groups used for?

- A - Allocating points to questions
- B - Allocating points to answers
- C - Collecting points allocated to questions
- D - Collecting points allocated to answers

Answer: D

Question: 84

One advantage of using conditional questions on a questionnaire is that you can guide the respondent through the questionnaire. When creating the conditional structure on a questionnaire, the sequence in which primary questions are asked depends on which of the following?

- A - The order in which you assign the questions to the questionnaire
- B - The order in which questions are asked is determined by the sequence number you assign when creating your conditional structure
- C - The order in which questions are asked always follows the original sequence number assigned to them in the Question table
- D - The order in which questions are asked is determined only by their place in the conditional question tree

Answer: D

Question: 85

You are creating a questionnaire, and you are interested in recording the answer the respondent selects for each question as they complete the questionnaire. What do you need to do?

- A - Select the All check box on the Setup tab of the Questionnaire form
- B - Select the Save question check box on the Setup tab of the Questionnaire form
- C - Select the Answer report check box on the Result tab of the Questionnaire form
- D - Select the Results page check box on the Result tab of the Questionnaire form

Answer: B

Question: 86

Selecting the Note check box allows you to do what?

- A - Provide the respondent with a note to supplement difficult questions
- B - Provide the respondent with a Note field (free text) on selected questions where notes apply
- C - Provide the respondent with a Note field (free text) on all questions
- D - Allow the respondent to make notes which can be printed out

Answer: C

Question: 87

What can a questionnaire administrator do on the Enterprise Portal?

- A - View all Planned answer sessions for all questionnaires
- B - Determine who should be given the right to complete a questionnaire
- C - View statistics related to all questionnaires
- D - Alter the results of specific questionnaires

Answer: A

Question: 88

When designing a questionnaire, you cannot activate the Back and Overview buttons for which of the following sequence type(s)?

- A - Sequence
- B - Random in questionnaire
- C - Random in result group
- D - Conditional

Answer: D

Question: 89
