

البحث داخل الداتا بيز

١ - نقوم بتصميم الداتا بيز كما يلي :-

٢ - وتكون الصفحة كما بالشكل التالي :

٣ - على الزر المسئول عن تنفيذ الأمر

نقوم بكتابة الشفرة التالية :

```
Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As
System.EventArgs) Handles Button1.Click

If TextBox1.Text <> "" Then

Dim str As String = "initial catalog=total;integrated security=sspi;"

Dim sql As String = "select * from Product where Name like'" & TextBox1.Text
& "%'"

Dim conn As New SqlConnection(str)

Dim cmd As New SqlCommand(sql, conn)

conn.Open()

Dim x As SqlDataReader

x = cmd.ExecuteReader()

Dim i As Integer

Dim s As String

s = "<TabelBorder='1'>"

While x.Read()

i += 1

s &= "<tr><td>" & i.ToString("00") & "<td nowrap>" & x("Name") &
"<br>"

End While

s &= "</tabel>"

Label1.Text = s

conn.Close()
```

Else

Response.Write("pase Write the item serch ")

End If

End Sub
